INTRODUCTORY NOTE.

This list of text and reference books relating to nursing and its allied subjects has been prepared for the purpose of assisting instructors in selecting books for students and for the training school library. A number of the books listed, with annotations, have, by permission, been taken from a list compiled by the Department of Nursing and Health, Teachers College, New York. Others have been annotated by specialists on the different subjects. The more recent nursing books are listed and annotated, making the list, as nearly as possible, up to date. A list of representative periodicals is appended for readers who desire to keep in touch with current literature by means of book reviews outlined in these periodicals. While introduced as an aid in selecting texts and books for nurses' libraries, it is hoped this bulletin will be of service to graduate nurses, special workers, and also to nursing organizations.

Annotated List of Text and Reference Books for Training Schools for Nurses.

I. ANATOMY, PHYSIOLOGY AND HISTOLOGY.

1. *Textbooks in Anatomy and Physiology.*

KIMBER, DIANA C. (Revised by GRAY, CAROLINE E.) *Textbook of Anatomy and Physiology for Nurses.* Macmillan, 3d ed., 1910. \$2.50.

Miss Kimber's book is recognized as a standard textbook for use in training schools for nurses. Written by a nurse and recently revised by a teacher of nurses, it seems to be more nearly adapted to the special needs of the training school than any other book at present available.

LEWIS, LEROY. *Anatomy and Physiology for Nurses.* Saunders, 2d ed., 1910. 344 pp. \$1.75.

This text, like the first mentioned one, suggests the general type of books prepared for the use of medical students. While aiming to eliminate unnecessary material, there still remain lists of Latin terms and technical phrases which are of no special value to nurses.

POPE, AMY E. *Anatomy and Physiology.* Putnam's Sons, 1913, 2d ed., 1916. \$1.75.

The *raison d'être* for the *Anatomy and Physiology* was to provide a textbook containing more description of essential physiological processes, though no larger than the books of anatomy in general use. To accomplish this, some details of anatomy usually included in nurses' textbooks, though unimportant for nurses to know, were omitted, the space thus gained being utilized for information of greater importance to those for whom the book was intended.

2. *Elementary Textbooks in Physiology and General Biology.*

BIGELOW, MAURICE A. and ANNA N. *Applied Biology.* Macmillan, 1911. \$1.35.

This book is intended as a textbook and laboratory guide in high school botany, zoology and human biology. Such a comprehensive view of the science of life should of course precede the more specialized study of human anatomy and physiology, but where this is impossible the regular textbook could be supplemented by readings and parallel study in such a book as this to get the broad biological point of view. The chapter on "Evolution and Heredity" and the sections dealing with reproduction and embryology will be of very particular interest and value to nurses, as will also the chapter on spore-plants, which deals with molds, yeasts and bacteria.

HOUGH, T. H., and SEDGWICK, WM. T. *The Human Mechanism.* Ginn, 1908. 564 pp. \$2.00.

An excellent and very reliable textbook of high school or college grade. It could precede the ordinary textbooks on anatomy and physiology with advantage or could be used as a supplementary text with such a book as Kimber. The section devoted to personal and public hygiene and sanitation is sound and fairly comprehensive and would serve excellently as a basis for the preliminary work in bacteriology and hygiene given in training schools.

HUNTER, GEORGE W. *A Civic Biology*. American Book Co., 1914. 416 pp. \$1.25.

Covers a course in biology for secondary schools. It is an excellent textbook for use in training schools as an introduction to the study of anatomy and bacteriology.

HUNTER, GEORGE W. *Laboratory Problems in Civic Biology*. American Book Co., 1916. 284 pp. \$0.80.

For use in secondary schools in teaching simple laboratory problems. Directions for carrying out simple experiments are direct and clear. It is a very useful guide either for the teacher or student in training schools.

PEABODY & HUNT. *Elementary Biology*, Macmillan, 1913. 229 pp. \$1.25.

A textbook used in secondary schools. The subject matter is well arranged. The chapters on animal and human biology will be especially useful as introduction to anatomy and bacteriology.

HUXLEY, T. H. *Lessons in Elementary Physiology*. Macmillan, 1910. (Revised.) \$1.10.

This is a well known and popular textbook recently brought up to date for high school and college use; valuable for supplementary reading; somewhat more advanced than HOUGH and SEDGWICK.

MARTIN, H. N. *The Human Body*. (Briefer Course.) Holt, 9th ed. \$1.25.

Probably the best elementary textbook on physiology.

3. Reference Books in Physiology.

MARTIN, H. N. *Human Body*. (Advanced Course.) Holt, 9th ed. (Revised), 1910. 546 pp. \$2.50.

An excellent reference book, concise and nontechnical, dealing with pure physiology. The chapter on embryology gives a splendid summary of the main facts of reproduction.

STEWART, G. N. *Manual of Physiology*. Balliere, 4th ed. 894 pp. 336 ill. \$3.75.

This is another standard work on physiology, which could be used for reference reading in connection with the classroom text.

4. Reference Books in Anatomy.

GRAY, HENRY (revised by SPITZKA, E. A.). *Anatomy, Descriptive and Surgical*. Lea, 18th ed. 1406 pp. \$6.00 cloth, \$7.00 leather. 1208 ill.

GERRISH, F. H. (*Editor*.) *Textbook of Anatomy*, by American authors. Lea, 943 pp. 1003 ill. \$6.50 cloth, \$7.50 leather.

Serves the same general purpose as Gray's anatomy, but is less technical.

5. Reference Books in Histology.

PIERSOL, GEORGE A. *Histology*. Lippincott, 8th ed. 418 pp. 438 ill. \$3.50.

A standard textbook in normal histology. Illustrations are remarkably clear and will prove helpful in the teaching of anatomy and physiology.

SCHAFFER, E. A. *Essentials of Histology*. Lea, 8th ed., 1910. 570 pp. \$3.50.

An excellent work dealing with both pathological and normal histology.

II. BACTERIOLOGY.

1. *Text and Reference Books in Bacteriology.*

LANGFIELD, MILLARD. *Infectious and Parasitic Diseases.* Blakiston, 1907. 260 pp. 33 ill. \$1.25.

Deals with the causes and manner of transmission of communicable diseases. Written especially for nurses. An excellent text and reference book.

MCISAAC, ISABEL. *Bacteriology for Nurses.* Macmillan, 1909. 179 pp. \$1.50.

An elementary textbook dealing with the essentials of bacteriology and the special application of bacteriological principles and methods to the work of the nurse.

NEWMAN, GEORGE. *Bacteria and the Public Health.* Putnam, 1907. \$5.00.

A standard work of the subject, combining scientific accuracy with a clear and popular style. Deals with the application of bacteriology to agriculture, industrial processes and public health. A good reference book for students of nursing. Well illustrated.

PARK, WILLIAM H., and WILLIAMS, ANNA W. *Pathogenic Micro-organisms.* Lea, 4th ed., 1909. 660 pp. 196 ill. \$3.75.

An advanced textbook for students, practitioners and health officers dealing with animal and vegetable micro-organisms in their relation to disease. Chapters on diphtheria and tuberculosis are particularly valuable. The most authoritative publication dealing with protozoa. Teachers will find Dr. Park's book invaluable as a guide to the technique of the laboratory.

WILLIAMS, H. W. *Manual of Bacteriology.* Blakiston, 4th ed., 1906. \$2.00.

A laboratory manual for the general student and for teachers of the subject.

FOX, HERBERT. *Elementary Bacteriology and Protozoology.* Lea & Febiger, 1916. 251 pp.

A good textbook for the beginning student. It is not over-technical and excellently well illustrated. The arrangement of the work is good.

JORDAN, EDWIN A. *A Textbook of General Bacteriology.* Saunders Co. 557 pp. \$3.00.

A book presenting the bacteriology of medicine and of the various trades and industries; also bacteriology of foods, plant diseases, water and sewage. It is valuable only as a reference book.

2. *Books for General Reading.*

CONN, H. W. *Bacteria, Yeasts and Molds.* Ginn, 1903. 203 pp. \$1.00.

A very popular elementary book on bacteriology, dealing especially with those forms of microscopic life which affect the home. An excellent work for the housekeeper and general reader.

CONN, H. W. *Bacteria in Milk and its Products.* Blakiston, 1903. 301 pp. \$1.25.

Deals with the processes of cheese and butter making, handling and protection of milk, etc., from the point of view of modern bacteriology.

PRUDDEN, T. MITCHELL. *Dust and its Dangers.* Putnam, 1891. 112 pp. ill. \$0.75.

A very elementary treatment of the subject for the general reader.

STERNBERG, GEORGE M. *Infection and Immunity.* Putnam. \$1.75.

A popular treatise by an acknowledged authority on the causes and prevention of infectious diseases. The work is eminently practical in character and will prove suggestive and helpful to all classes of readers.

III. CHEMISTRY AND PHYSICS.

1. *Elementary Textbooks in General Chemistry.*

HILLYER, HOMER W. *Laboratory Manual of Chemistry.* Macmillan, 1899. \$0.90.
An elementary textbook used in secondary schools.

MACPHERSON and HENDERSON. *Elementary Principles of Inorganic Chemistry.* Ginn, 1908. \$1.25.

A simple textbook in beginning chemistry for high school and college students.

OTTBURG, REUBEN. *Chemistry for Nurses.* Macmillan, 1915. 140 pp. \$1.25.

A textbook that has been largely used in training schools. Elementary in character and arrangement and would serve very well for students who had not had any previous study of chemistry.

POPE, AMY E. *Physics and Chemistry for Nurses.* Putnam's Sons, 1916. \$1.75.

That nurses may have a proper understanding of fundamental principles underlying much of their work in cleaning, cooking, disinfecting, etc., it is necessary to have a knowledge of chemistry. The work contains many important applications of the chemical and physical processes described in disinfection, cleaning, cooking and other processes necessary for nurses to know. It further explains the important chemical and physical processes constantly referred to in physiology, *materia medica* and other studies included in the school of nursing curriculum. There are a number of experiments listed and described which will illustrate facts referred to in the lesson.

REMSEN, IRA. *Introduction to Study of Chemistry.* Henry Holt Co., N. Y., 1909, 8th ed. \$1.25.

An elementary textbook used in secondary schools.

2. *Household Chemistry.*

DODD, MARGARET E. *Chemistry of the Household.* American School of Home Economics, 1907. \$1.25.

A practical chemistry dealing with water, combustion, foods, cooking, cleaning, laundry work, stains, etc., from the point of view of the house-keeper.

RICHARDS, ELLEN H., and ELLIOTT, S. MARIA. *Chemistry of Cooking and Cleaning.* Whitcomb & Barrows, 1907. 186 pp. \$1.00.

Deals with the chemical processes involved in the common household activities, the effect of soaps, detergents and cleaning agents on different metals, woods, textiles, etc., the chemistry of the laundry and of the principal cooking processes. Very practical, simple and reliable, as far as it goes.

3. *Physiological Chemistry.*

BEDE, S. P., and BUXTON, B. H. *Physiological Chemistry.* Macmillan, 1904. 195 pp. \$1.50.

A simple and concise treatment of the chemistry of digestion, nutrition, etc., for students unfamiliar with organic chemistry.

HAWK, PHILIP B. *Practical Physiological Chemistry.* Blakiston, 3d ed., 1910. 440 pp. \$2.50.

A standard laboratory guide and textbook for students in schools of medicine and science. Deals with chemistry of digestion, analysis of urine, milk, blood, faeces, etc. Treatment is fairly simple.

AMOSS, HAROLD L. *Chemistry and Chemical Analysis for Nurses.* Lea & Febiger, 1915. 268 pp.

An exceedingly good text arranged for the use of training schools. The subject matter is well arranged and clearly given. Two chapters are given to urine and urinalysis and contains a clear statement of methods of analysis.

5. *Urine Analysis.*

MARQUARDT, E. W. *Practical Urinalysis for Nurses.* Chicago Medical Book Co. 40 pp. \$0.60.

A compact little book giving in condensed form the essential procedures in ordinary urine tests.

TYSON. *Guide to the Examination of Urine.* Blakiston, 10th ed. (Revised.) 284 pp. \$1.50.

SAXE, G. A. DE S. *Examination of Urine.* Saunders, 2d ed. 448 pp. \$1.75

This and the preceding book are more detailed and comprehensive; intended for the use of the physician.

GIBSON, ANNA L. *Clinical Laboratory Technic for Nurses.* Whitcomb & Barrows, 1916. 194 pp. \$1.25.

A practical textbook for use in laboratory work prepared primarily for graduate nurses, but may be used in part by the student nurses. The arrangement is simple and the methods reliable.

6. *Physics.*

DUNCAN, R. K. *The New Knowledge.* Barnes, 1905. 263 pp. \$2.00.

A popular account of the new physics and new chemistry in their relation of the new theory of matter.

HENDERSON and WOODHULL. *Elementary Physics.* Appleton, 1900. 388 pp. \$1.10.

A simple and practical book on every day applications of physics.

IV. DIETETICS, NUTRITION AND INVALID COOKERY.

1. *Textbooks on Dietetics for Nurses.*

FRIEDENWALD and RUHRAH. Dietetics for Nurses. Saunders, 1910. 305 pp. \$1.50.

Very highly recommended as an authoritative textbook in dietetics for the use of nurses in training and domestic science students. The book is an abridged edition of the author's standard text "Diet in Health and Disease."

HALL, WINFIELD S. Nutrition and Dietetics. Appleton. 315 pp. \$2.50.

A simple and comprehensive textbook for nurses, dietitians and students of medicine dealing with the essentials of feeding in health and disease.

POPE, AMY E., and CARPENTER, MARY L. Essentials of Dietetics. Putnam's Sons. 1916. \$1.00.

Contains a description of the important food-elements and foods origin, their special characteristics, digestion and metabolism; the dietetic values of different foods; conditions regulating food requirements in health and disease; examples of methods of calculating the caloric value of foods, of menus and of the modification of milk for infant feeding; methods of preserving and cooking food. The book also contains a few recipes for class use, but is not intended as a recipe book.

2. *Invalid and General Cookery.*

FARMER, FANNIE MERRITT. Foods and Cookery for the Sick and Convalescent. Little, Brown, 1911. 276 pp. \$1.50.

A very comprehensive and reliable book, including a brief study of the nutritive value of foods, the dietary treatment of disease and the general subject of cookery and service. The recipes are numerous and varied, most of them being given in individual form. The illustrations are especially helpful, showing dainty and attractive methods of serving all kinds of food for sick people.

HILL, JANET MCKENZIE. Cooking for Two. Little, Brown, 1909. 407 pp. \$1.50. Good recipes for dainty dishes for a very small family.

HILL, SARAH C. Cookbook for Nurses. 4th ed. (Revised.) \$0.75.

A compact little volume for the private nurse's hand-bag.

LINCOLN, MARY T. Boston Cookbook. Little, Brown. 578 pp. \$2.00.

A reliable cookbook, presenting a wide range of recipes for general use. Includes a short discussion on the composition of foods and diets for children and the sick.

LINCOLN, M. T., and BARROWS, A. Home Science Cook-book. Whitcomb & Barrows, 1904. 281 pp. \$1.00.

Very simple and practical home cook-book. Recipes are reliable and inexpensive and suited to the family of moderate income.

PATTEE, ALIDA F. Practical Dietetics. Mt. Vernon, N. Y., Author and Publisher. 6th ed. 474 pp. \$1.50.

A digest of the principles of nutrition, with tables of food values worked out on the basis of caloric values. The private nurse will find here a large quantity of material in condensed and usable form.

SPRING, HELEN M. Individual Recipes. Whitcomb & Barrows. \$0.25.

A convenient little book containing reliable small quantity recipes.

3. *Reference Books in Dietetics.*

CHAPIN, HENRY DWIGHT, M.D. Theory and Practice of Infant Feeding. Wood, revised ed., 1909. 350 pp. \$2.25.

A standard textbook on artificial feeding, written by an authority on the subject. Presents the subject simply, plainly and comprehensively.

BARDSWELL, NOEL D., and CHAPMAN, JOHN E. Diet in Tuberculosis, with Costs of Food and their Preparation. Oxford Univ. Press, 1908. 62 pp. \$0.75.

A full account of the practical value and costs of diets in general, and of the foods most valuable in the treatment of tuberculosis.

CARTER, HERBERT S. Diet Lists of the Presbyterian Hospital, New York City. Saunders Co. 129 pp. \$1.00.

While prepared primarily for the Presbyterian Hospital, it can be used in all hospitals. It contains an explanation of the various types of diets, the arrangement of menus for different diets, quantities and food value. The book contains tables of food values and chemical composition of foods, also some recipes. It may be recommended not only for use in the hospital but also for graduate nurses to keep them in touch with present-day methods of diet.

HUTCHINSON, ROBERT. Food and Dietetics. Wood, revised ed., 1906. 582 pp. \$3.00.

A standard book dealing with nutritive constituents and relative value of foods, amount of food required in health, in childhood, in disease, etc., also composition, cookery and digestion of food. Probably the best general reference book available on the subject of dietetics for the serious student.

LOCKE, EDWIN A. Food Values. D. Appleton & Co., 1913. 110 pp. \$1.25.

This book is not written nor intended for a textbook. There is a brief introduction or classification and uses of food in the body and methods of calculating food values. The main part takes up values of foodstuffs which is arranged in very comprehensive tables. This work will be found of great value in teaching dietetics.

RICHARDS, ELLEN H. The Cost of Food. A Study in Dietaries. Wiley, 1901. 150 pp. \$1.00.

A simple and practical treatment of the nutritive value, choice and cost of foods for individuals, families, institutions, etc. The book is intended for the general reader, but will be found very useful for student nurses and social workers. Shows how to get a maximum of nourishment at the least expenditure.

THOMPSON, W. GILMAN. Practical Dietetics. Appleton. \$5.00.

An old well known text treating mainly of diet in disease.

WILEY, H. W. Foods and their Adulteration. Blakiston, 2d ed., 1908. 641 pp. 97 ill. \$4.00.

An exceedingly comprehensive work dealing with every phase of the origin, manufacture and composition of food products, infants' and invalids' foods, detection of common adulterations and food standards. An excellent reference book in dietetics.

4. *Pamphlets, Bulletins, Etc.*

SHERMAN, HENRY C. Quantitative Aspects of Nutrition. Technical Education Bulletin, No. 5. Teachers College, Columbia Univ., 525 W. 120 St., N. Y. 16 pp. \$0.10.

Publications of the U. S. Department of Agriculture. Government Printing Office, Washington:

1. Bulletins—particularly 31, 85, 93, 101, 121, 126, 141, 142, 143, 156, 162, 166, 193, 203, 256, 270, 298, 332, 429, 431, 444, 450. (Free.)
2. Experiment Station Record, published monthly. \$1.00 a year.
3. Year-books—especially 1901—which contains articles dealing with dietaries in public institutions.

V. HOUSEHOLD ECONOMICS AND HOUSEHOLD HYGIENE.

ELLIOTT, S. MARIA. Household Hygiene. American School of Home Economics, 1907. 211 pp. \$1.25.

Deals with the questions of heating, lighting, plumbing, disinfection, etc., clearly and simply; a book for the general reader.

PARLOA, MARIA. Home Economics. Century Co., 1906. 416 pp. \$1.00.

One of the standard works on practical household processes, full of valuable information for the housekeeper in large or small institutions. The chapters on the treatment of wood are of special value.

RICHARDS, ELLEN H. Cost of Cleanliness. Wiley, 1908. 104 pp. \$1.00.

One of Mrs. Richard's "Cost Series," intended for the general reader. Gives in graphic form the economic losses due to insanitary methods of public and private housekeeping.

RICHARDS, ELLEN H., and TALBOT, MARION. Home Sanitation. Whitcomb & Barrows, 2d ed., 1910. \$1.00.

Scientific facts presented in a plain, practical form for the average reader.

Bulletins of the Bureau of Entomology. L. O. Howard, chief, U. S. Department of Agriculture, Washington, D. C. Circulars 36, 46, 47, 48, 50, 51, 71, 108, dealing with household pests and their extermination. (Free.)

Bulletins of the Department of Agriculture, Washington, D. C. (Free.)

VI. HYGIENE (GENERAL) AND MUNICIPAL SANITATION.

1. *Text and Reference Books.*

BASKERVILLE, CHARLES (Editor). Municipal Chemistry. McGraw, Hill, 1911, 526 pp. \$5.00.

A compilation of lectures by prominent experts, dealing with the application of chemistry to public health problems. The headings of several chapters will indicate the scope of the discussions—Water, Milk, Food Adulteration, Drugs and their Adulteration, Street Cleaning, Sewerage, Gas, Smoke, Ventilation, Textiles, etc. Scientific, authoritative and up to date, without being too technical for the average intelligent student.

BERGEY, D. H. *Principles of Hygiene*. Saunders, 3d ed., 1909. 555 pp. \$3.00.

A book written for students of medicine, physicians and health officers, giving the most modern conclusions on the subject of hygiene. A standard book of reference dealing with all phases of hygiene. Probably the most generally valuable of the larger works on the subject.

HARRINGTON, CHARLES. *Practical Hygiene*. Lea, 4th ed., 1911. 850 pp. \$4.25.

An exhaustive treatise on all phases of personal and public hygiene and sanitation. A standard reference book.

McISAAC, ISABEL. *Hygiene for Nurses*. Macmillan, 222 pp. \$1.25.

An elementary textbook for the junior nurse, dealing with the essential facts of personal, household and public hygiene in the author's usual clear and concise manner. The hygiene of the hospital ward is dealt with and application is made of the principles of personal hygiene to nurses in their work.

PARKES, L. C., and KENWOOD, H. R. *Hygiene and Public Health*. Blakiston, 4th ed., 1911. 691 pp. 86 ill. \$3.50.

A comprehensive and satisfactory textbook.

PRICE, GEORGE M. *Hygiene and Sanitation for Nurses*. Lea & Febiger, 1915. 235 pp.

An excellent textbook for first year students in training schools.

PRICE, GEORGE M. *Hygiene and Public Health*. Lea. 255 pp. \$1.00.

An epitome of essential facts in hygiene and sanitation which would serve admirably as a text for sanitary inspectors or district nurses.

RAPEER, LEWIS W. *Educational Hygiene*. Scribner, 1915. \$2.50.

An extremely interesting work, treating of educational hygiene at the different periods of life. It may be used for required reading in training schools, especially for nurses contemplating doing school work.

TERMAN, LEWIS M. *The Hygiene of the Child*. Houghton, Mifflin Co., 1914. 418 pp. \$1.65.

Written for teachers in public schools, but very well suited for nurses, especially for those who are making children's nursing a speciality, and for school nurses. It is a valuable reference book for a training school library.

ROSENAU. *Disinfection and Disinfectants*. Blakiston, 1909. ill. \$2.00.

A very useful book in hospital work, dealing with all the important disinfecting agents, special values of each, strength, preparation, methods of using, etc.

ROSENAU, WILLIAM J. *Preventive Medicine and Hygiene*. D. Appleton & Co., N. Y., 1914. 1074 pp. \$6.00.

An extensive and authoritative work of nursing. The work is based upon modern progress in hygiene and sanitation and covers the broad field of medical and related sciences which form the foundation of public health work. It will prove a valuable asset to a training school library.

SEDGWICK, W.M. T. *Principles of Sanitary Science and Public Health.* Macmillan, 1905. 367 pp. \$3.00.

A standard book dealing with the ancient struggle between health and disease, the various theories that have been advanced, and modern developments in the science. The work of the statistician, the bacteriologist, the physician, and the sanitary engineer are all represented, special attention being paid to systems of water supply, sewage disposal, etc. A very useful reference book.

2. *Books and Pamphlets for the General Reader.*

FISHER, IRVING. *Bulletin 30 of the Committee of One Hundred on National Health. Report on National Vitality—Its Waste and Conservation.* Washington: Government Printing Office, 1910. \$0.15.

A very complete statistical and general survey of the causes that impair national vitality, with recommendations from social, medical and economic authorities on the best methods of conserving national health.

GODFREY, HOLLIS. *Health of the City.* Houghton, Mifflin, 1910. \$1.25.

A work of social and civic importance which touches on certain phases of the cities' welfare with a view of awakening interest. Public health, air, food, noise, city water, sewerage and plumbing and city housing, etc., are dealt with clearly and interestingly. An excellent book for general and supplementary reading.

HUTCHINSON, Woods. *Preventable Diseases.* Dodd, 1908. \$1.20.

An interesting treatise on the subject in the author's picturesque and semi-humorous style, which is popular with the general public.

Monthly Bulletin, California State Board of Health. (Free.)

Health Education Series. Published by Health Education League, 8 Beacon St., Boston, Mass. \$0.02 to \$0.08 each, or \$1.50 to \$5.00 per 100. (Samples free.)

A series of twenty-four small pamphlets written in simple, plain language for the enlightenment of the general public. Some of the topics treated are—Milk, Meat and Drink, Healthful Homes, Care of Children, Sexual Hygiene, Tuberculosis, Industrial Hygiene. The authors are in most cases recognized authorities and the treatment of the subjects, while not technical, is scientific and thoroughly reliable.

Public Health Movement. *Annals of American Academy of Political and Social Science.* Vol. XXXVII, No. 2, March, 1911. Published by American Academy of Political and Social Science, Philadelphia.

A series of articles on various aspects, social, economic and civic, of the public health question. Subjects such as Housing, Sanitation, Insects, Ventilation, Social Service, Medical Inspection, Census and Infant Mortality, are discussed by such well known authorities as Dr. Cabot, Lawrence Veiller, Cresy, Wilbur, William Allen, Dr. Newmeyer and Leonard Ayres.

VII. PERSONAL HYGIENE, SEX HYGIENE AND EUGENICS.

1. Personal Hygiene.

CAVANAGH, FRANCIS. *Care of the Body.* Dutton, 1907. 291 pp. \$2.50.

An attractively written series of essays on personal hygiene for the general reader. Though not by any means exhaustive, the book gives many of the results of modern scientific investigation and medical thought in a form which is at once clear and interesting. The author has a wide field, not only of scientific knowledge but of classical and modern history and literature to draw on.

GALBRAITH, ANNA M. *Hygiene and Physical Culture for Women.* Saunders, 1911. \$2.00.

Written especially for the college woman by a woman physician.

PYLE, WALTER L. (*Editor.*) *Manual of Personal Hygiene. Proper Living upon a Physiologic Basis.* Saunders, 4th ed., 1910. 472 pp. \$1.50.

A compilation of articles by several physicians aiming to give a rational and authoritative treatment of the subject for the guidance of students and the general public. Special attention is given to the hygiene of school life. In the new edition there have been added chapters on Domestic Hygiene, Home Gymnastics and First Aid. The tone of the book is conservative and the fact of its widespread use in colleges is some evidence of its reliability.

2. Sex Hygiene and Eugenics.

DOCK, LAVINIA. *Hygiene and Morality.* Putnam, 1910. 200 pp. \$1.25.

A manual for nurses and others giving an outline of the medical, social and legal aspects of the specific diseases. It is divided into three parts: I. Venereal Disease; II. Prostitution; III. The Prevention of Venereal Disease. The book gives a comprehensive and very able discussion of a difficult problem, proving conclusively that the prevention of prostitution is essential for the physical integrity and safety of the race.

GALBRAITH, ANNA M. *Four Epochs of a Woman's Life.* Saunders. \$1.50.

Deals mainly with the physiological aspects and the hygienic care required at the critical periods of development.

HALL, G. STANLEY. *Youth—Its Education, Regimen and Hygiene.* Appleton, 1907. 379 pp. \$1.50.

An abbreviated edition of the author's larger work "Adolescence," which has received such wide attention, particularly among educators. DR. HALL emphasizes the great significance of the physical changes which occur in the transition period between childhood and adult life and the accompanying psychological phenomena which characterize that period, and on this basis he criticizes much in the ordinary training and treatment of growing children.

MORROW, PRINCE. *Social Diseases and Marriage.* Lea, 1911. 390 pp. \$3.00.

A strong, sane, authoritative work on the specific diseases from the sanitary, moral and social point of view.

Transactions of the American Society of Sanitary and Moral Prophylaxis, Vol. I, II, III. Published by the Society, 9 E. 42d St., New York. \$0.50 per vol.

These transactions contain papers and discussions dealing with the various phases of the social evil in its sanitary, educational, moral and legal aspects.

Educational Pamphlets: Published by the American Society of Sanitary and Moral Prophylaxis. 9 E. 42d St., New York. Prices, \$0.10 to \$0.25.

These small pamphlets (a complete list of which can be obtained from the secretary of the society at the above address) are prepared for distribution among parents and teachers, boys and girls, young men and women, with the idea of instructing them and the public generally in some of the facts of sex hygiene.

Pamphlets published by the Committee on Prevention, of the Association for the Blind, New York City.

Bibliography and Pamphlets published by National Vigilance Committee for the Suppression and Prevention of the White Slave Traffic.

VIII. NURSING (GENERAL).

BECK, AMANDA K. Reference Handbook for Nurses. Saunders, 2d ed., 1908. 199 pp. \$1.25.

A small handbook containing concise directions, formulæ, etc., for most of the common nursing procedures. Its compact form makes it a convenient little book for the private nurse's hand bag.

GOODNOW, MINNIE. First-Year Nursing. Saunders, 2d ed., 1916. 354 pp. \$1.50.

This work deals entirely with the practical side of first-year nursing work—the application of textbook knowledge. It tells how to do those things the student is called upon to do in the first year in the training school. The book may truly be called the Practice of First-Year Nursing.

MAXWELL, ANNA C., and POPE, AMY E. Practical Nursing. Putnam, 1909. 535 pp. \$1.75.

A deservedly popular and very satisfactory textbook in nursing for the use of students in training schools. The methods and technique are those observed in the Presbyterian Hospital, New York.

MCISAAC, ISABEL. Primary Nursing Technique. Macmillan, 1908. \$0.75.

A very simple and practical textbook in the common nursing procedures, for the use of the first-year nurse. Though recently published, the book is already a popular one in training schools.

NIGHTINGALE, FLORENCE. Notes on Nursing—What it Is and What it Is Not. Appleton, 1860. 146 pp. \$0.75.

A small manual in nursing—the first written by a nurse—remarkable for its comprehension of natural laws, the soundness of its teaching, the vigor of its English and the combination of practical wisdom and psychological truths; has long been a classic.

NIGHTINGALE, FLORENCE. Notes on Nursing for the Laboring Classes. Harrison & Sons, 1861. 114 pp.

A simplified edition of Notes on Nursing, written for the use of home nurses, mothers and others who have the care of children.

POPE, AMY, and POPE, THIRZA. Quiz Book on Nursing for Teachers and Students. Putnam. \$1.75.

An assortment of leading questions on the subjects usually taught in training schools. Useful as a method of quick review or in preparation for state examinations. Includes chapters on district nursing, hospital planning and hospital bookkeeping.

ROBB, ISABEL HAMPTON. Principles and Practice of Nursing. Koechert, 3d ed., 1910. 565 pp. \$2.00.

The recent edition of Mrs. Robb's admirable textbook introduces the newer treatments and procedures and makes the work again thoroughly reliable and up to date. This was the first of the books to deal scientifically with nursing as a subject by itself. Its continued popularity over a long period of years is the best evidence of its value.

SANDERS, GEORGIANA J. Modern Methods in Nursing. Saunders, 1912, 881 pp. 228 ill. \$2.50.

A recent addition to nursing textbooks. The general arrangement and treatment is similar to that found in other well known texts, though Miss Sanders has attempted something much more comprehensive in scope and detail than most of the other writers. The large number of illustrations will be welcomed by students.

STEWART, ISLA, and CUFF, H. E. Practical Nursing. Blackwood & Sons, 1907. \$1.25.

An adequate description of the underlying principles of nursing, with detailed methods of practice as observed in St. Bartholomew's Hospital, London.

IX. MEDICAL DISEASES AND MEDICAL NURSING.

1. *Textbooks.*

EMERSON, CHARLES P. Essentials of Medicine. Lippincott, 2d ed., 1911. 381 pp. \$2.00.

A textbook on general medical diseases written for nurses and first-year medical students, giving a clear, concise picture of the important medical diseases, and general principles of treatment. The style is simple and interesting. Probably the most satisfactory book of the kind that has been written.

FARR, CLIFFORD B. Outlines of Internal Medicine. Lea & Febiger, 1915. 408 pp. \$2.00.

An excellent textbook for medical nursing. The work is well arranged and adapted to the arrangement of courses in training schools. The subjects are treated solely from a nursing standpoint and the content is simple, direct and clear. The book is well illustrated. It should prove to be a very satisfactory textbook.

HENRY, NORMAN J. *A Nurses' Handbook of Medicine*. Lippincott, 1908. 268 pp. \$1.50.

A digest of lectures on medicine given to nurses. The opening chapters on general pathology and medical terminology are particularly serviceable.

HOXIE, GEORGE H. *Practice of Medicine for Nurses*. Saunders, 1908. 284 pp. \$1.50.

Covering as it does in very small space, the whole field of disease, medical and surgical, the treatment can not but be very condensed and in some places very superficial. The book is a compilation of articles by several specialists, some of whom are leading authorities on the subjects they represent.

2. Reference Books.

HUGHES, DANIEL E. (Revised by SCOTT, R. J. E.) *Practice of Medicine*, Blakiston, 10th ed. 878 pp. 63 ill. \$2.50.

A complete and very concise epitome of medical diseases, including mental and skin diseases, with causes, symptoms, pathology, treatment, etc. A good reference book, not too technical or detailed, and arranged in order for ready reference.

HARE, H. A. (*Editor.*) *Modern Treatment—The Management of Disease with Medicinal and Nonmedicinal Remedies*.

OSLER, WILLIAM. *Practice of Medicine*. Appleton, 7th ed., (revised), 1910. \$5.50.

A standard work on general medicine, quite detailed and comprehensive, but not too technical.

STEVENS, A. A. *Manual of the Practice of Medicine*. Saunders, 8th ed. 556 pp. ill. \$2.50.

Another brief, condensed, treatment of the essentials of medical diseases and medical practice, for the use of students and physicians.

X. SURGERY (GENERAL AND ORTHOPEDIC), SURGICAL NURSING, OPERATING-ROOM TECHNIQUE AND BANDAGING.

1. Textbooks on Surgery and Operating-Room Technique.

FOWLER, RUSSELL S. *The Operating Room and the Patient*. Saunders, 3d ed., 1908. 581 pp. ill. \$2.00.

Deals with the rules of the operating room—its personnel, anaesthesia, the preparation of the patient, positions, instruments, after-treatment, etc. One of the most complete and satisfactory books on the subject.

HOWARD, RUSSELL. *Surgical Nursing and Principles of Surgery for Nurses*. Longmans, Green, 1908. 334 pp. \$1.70.

FULLERTON, ANNA M. *Surgical Nursing*. Blakiston, 3d ed. 69 ill. \$1.00.

A compilation of lectures on nursing in abdominal and gynecological operations, with general principles and procedures in the operating room and dressing room.

ROBB, HUNTER. *Aseptic Surgical Technique*. Lippincott, 4th ed., 1906. 264 pp. \$2.00.

A comprehensive treatment of modern surgical materials, methods and operative procedure, which is of special value to the operating-room nurse.

PARKER, E. M., and BRECKINRIDGE, S. D. *Surgical and Gynecological Nursing*. J. B. Lippincott Co. 425 pp. \$2.50.

A very practical textbook giving the essential procedures in general surgical and in gynecological nursing. The amount of instruction in theory and practice is well proportioned. The book shows an unusual amount of care in its preparation and deserves to rank among the best textbooks for nurses. It is very largely illustrated.

BERRY, JOHN M. *Orthopedic Surgery for Nurses*. Saunders Co., 1916. 97 pp. \$1.00.

A much needed book on a subject about which little has been written for nurses. It might be termed a *Primer of Orthopedics for Nurses*. It covers, in a simple, concise manner, the classification of these diseases. It states their underlying causes, and, in a few words, their general plan of treatment. It aims to teach the nurse observance of abnormal postures and visual results of these diseases.

2. *Textbooks on Bandaging.*

DAVIS, G. S. *Principles and Practice of Bandaging*. Blakiston, 1902. 146 pp. 164 ill. \$1.00.

HOPKINS, W. B. *The Roller Bandage*. Lippincott, 7th ed. 160 pp. 100 ill. \$1.50.

Both reliable books on bandaging. Illustrations are clear and numerous.

ELIASON, ELDRIDGE L. *Practical Bandaging*. J. B. Lippincott Co., 1914. 125 pp. 155 ill. \$1.00.

This book covers the field in a simple and nontechnical manner. Every conceivable bandage is fully and separately described, and in every case illustrated. It can not fail to be a most valuable textbook for the purpose. Adhesive plaster and plaster of paris dressings receive exhaustive consideration.

WHITING, A. D. *Bandaging*. Saunders Co., 1916. 151 pp.

A textbook designed for beginners in bandaging, dealing almost entirely with the use of the roller bandage. It is well illustrated.

3. *Reference Books on Surgery.*

FOOTE, EDWARD M. *Minor Surgery*. Appleton, 1908. 752 pp. \$5.00.

The best book on emergency surgery, treating of wounds, fractures, sprains, burns and minor operations, surgical materials, technique, etc. The section on bandaging is comprehensive and well illustrated.

GRIFFITH, F. R. *A Handbook of Surgery*. Saunders, 1906. 557 pp. \$2.00.

A very compact, handy reference book in surgery, dealing with bandaging and minor surgery, anaesthesia, preparation of materials, operative procedures, after-treatment, etc. There is a chapter on bacteriology and its application to wound treatment.

STEWART, FRANCIS T. *Manual of Surgery*. Blakiston, 2d ed. 682 pp. 553 ill. \$4.00.

A condensed, ready, reference book on surgical diseases and treatment for the use of students and physicians. One such work should be in every nursing library and this manual is probably the best for general reference.

WHARTON, HENRY K. *Minor Surgery and Bandaging*. Lea, 7th ed., 1909. 683 pp. \$3.00.

A popular work on minor surgery for the use of the general practitioner. Gives a large section on bandaging as well as on the treatment of wounds, burns, fractures, etc. A good reference book for surgical nursing and first aid.

4. *Reference Books in Orthopedic Surgery.*

BRADFORD and LOVETT. *Orthopedic Surgery*. Wood. \$5.00.

TAYLOR, HENRY LING. *Orthopedic Surgery*. Appleton. 253 ill. \$5.00.

WHITMAN, ROYAL. *Orthopedic Surgery*. Lea, 3d ed. (Revised.) 871 pp. 554 ill. \$5.50.

All of these are reliable works dealing with deformities, their causes, symptoms and treatment, apparatus used, surgical technique and manipulation.

XI. FIRST AID IN EMERGENCIES.

LYNCH, MAJOR CHARLES. *American Red Cross Textbook on First Aid*. Blakiston, 1909. 274 pp. 74 ill. \$1.00.

A very compact little handbook for the use of the general public, giving simple and explicit directions for the first treatment of all kinds of emergencies, medical and surgical.

LYNCH, MAJOR CHARLES. *American Red Cross Abridged Textbook on First Aid*. (General Edition or Industrial Edition.) Blakiston. 182 pp. \$0.30.

A smaller edition in paper cover, giving much condensed information. The Industrial Edition gives special attention to accidents that are likely to occur in mines, factories, etc.

MORROW, ALBERT S. *Immediate Care of the Injured*. Saunders, 1908. 340 pp. 238 ill. \$2.50.

This book is intended as a text for advanced first aid classes. It is thorough and sound without being technical, and the nurse, as well as the layman, will find it very serviceable. The book is issued in an attractive form and is excellently illustrated.

XII. FEVER NURSING AND INFECTIOUS DISEASES.

PAUL, GEORGE P. Nursing in the Acute Infectious Fevers. Saunders, 2d ed., 1911. 246 pp. \$1.00.

A recent book on the infectious diseases, written for the nurse. Follows much the same plan as previous books on the subject; is compact, concise, and well illustrated. Useful either as a text or reference book.

REGISTER, EDWARD C. Practical Fever Nursing. Saunders, 1907. 352 pp. \$2.50.

A very complete work on infectious and contagious diseases, with special reference to modern treatment and nursing. The book is attractively gotten up, and has many fine illustrations. A good reference or textbook.

WILCOX, REYNOLD WEBB. A Manual of Fever Nursing. Blakiston, 2d ed., (revised), 1908. 229 pp. \$1.00.

A book that has proven generally helpful and suggestive. Introductory chapters deal with diagnosis, thermometry, hydrotherapy, diet, general treatment, disinfections, etc. The later chapters deal with the common fevers of infectious and thermic origin.

WILSON, J. C. Fever Nursing. J. B. Lippincott Co., 1912, 7th ed. 259 pp. ill. \$1.00.

Dr. Wilson has the happy faculty of writing a book that readers can understand without effort. His style is clear and comprehensive, and, while brief in his explanations, he always covers the ground intended without missing a point. Especial attention has been given to the causation and prevention of disease, disinfection, the details of the method of treating enteric fever by systematic cold bathing, the subject of serum therapy, and to the special duties of the nurse in the care of soldiers. The book contains an article upon the Oriental Plague. (Pub. Note.)

XIII. CHILDREN'S DISEASES AND NURSING OF INFANTS AND CHILDREN.

1. *Textbooks and Manuals in the Nursing and Physical Care of Infants and Children.*

FORDYCE, DINGWALL. Care of Infants and Young Children. Livingstone, 1912. 1 s. 6 d.

A valuable little manual for mothers and others who have the care of children. Written in a simple, sensible and straightforward way.

GRIFFITH, J. P. CROZIER. Care of the Baby. Saunders, 4th ed. (revised), 1909. 455 pp. ill. \$1.50.

A deservedly popular little book for mothers and nurses dealing mainly with the hygiene of the normal infant.

HOLT, L. EMMET, M.D. Care and Feeding of Children. Appleton, 1910. 191 pp. \$0.75.

Dr. Holt's books on infant feeding have become classics among writers upon the care of children. Though elementary, this is very complete. Nothing concerning the care and feeding of healthy children is overlooked. It is written in catechism and intended for the use of mothers and children's nurses.

McCOMB, ROBERT S. Diseases of Children for Nurses. Saunders, 2d ed., 1911. 470 pp., ill. \$2.00.

A good general textbook on children's diseases, including infant feeding, treatment in emergencies, prophylaxis and hygiene. Illustrations are good.

2. Reference Books and Pamphlets on Diseases of Children.

CHAPIN, H. D., and PISIK, G. R. Diseases of Infants and Children. Lea & Febiger, 1911. \$4.50.

A reference book for student nurses.

HOLT, L. EMMET. Diseases of Infancy and Childhood. Appleton, 1910. 1148 pp. \$6.00.

Every aspect of the normal child is first considered. Then the different diseased conditions are discussed. There are many plates and illustrations. Especially prepared for physicians and for graduate nurses.

JACOBI, ABRAHAM. Diseases of Children. Appleton. \$6.00.
For physicians and nurses.

KERLEY, CHARLES GILMORE. Treatment of Diseases of Children. Saunders, 1909. 629 pp. \$5.00.

This is concise and definite. Some topics interesting to nurses are: Ways of administering nauseating and unpalatable drugs; vaccine therapy; gymnastic therapeutics with their adaptation. Especially prepared for the use of physicians and graduate nurses.

ROTCH, THOMAS MORGAN. The Hygiene and Medical Treatment of Children. Lippincott, 1896. 1106 pp. \$6.00.

Dr. Rotch lays especial emphasis upon blood in its relation to health and disease. This is the most interesting of the large books. It is in familiar lecture form.

RUHRAH, JOHN. A Manual of Diseases of Children. Saunders, 2d ed. \$2.00.
A book for physicians and nurses. Includes all the salient points in clear and concise form.

Publications of Childrens Bureau, Washington, D. C.

3. Books on the Psychological and Social Development and Training of Children.

HEATH, H. LYEWELLYN, D.P.H. The Infant, the Parent, and the State. Kind, 1907. 183 pp. \$0.50.

The author's foreword states the purpose of this little book as follows: "It is an attempt to bring forward facts, in a form easily assimilated, which are of moment to us, because in caring for the infant, we are improving the child, and the child of today is the parent of the next generation. Bound up with the interests of the infant are those of the parent, and the state has an interest in both." It gives special attention to the claims of the illegitimate child.

OPPENHEIM, NATHAN. *The Development of the Child.* Macmillan, 1910. 292 pp. \$1.25.

The author believes that in order to obtain a just heritage for each child, we should begin with the training of parents. A book of foundation principles; unfortunately rather too abstract to obtain a wide reading from those who need it.

SPARGO, JOHN. *The Bitter Cry of the Children.* Macmillan, 1906. \$1.50.

This gives a good presentation of how the children of poverty live.

WASHBURN, MARION FOSTER. *The Study of Child Life.* American School of Home Economics, 1907. 178 pp. \$1.25.

This is the most interesting of the books under this heading. It aims to give the student a better understanding of child nature through its discussion of Child Development, Faults and Remedies, Character Building, Play, Occupation, etc. It gives a bibliography for further study.

HILLYER, HOMER W. *Child Training.* Century Co., 1915. \$1.60.

A book for children's nurses and parents.

KIRKPATRICK, EDWIN A. *Fundamentals of Child Study.* Macmillan, 1903. 385 pp. \$1.25.

This book presents in an organized form, an outline of child study for student teachers and parents. It treats of the physical growth and development of the child, the development of instincts and intellect; also the study and method of treatment of the individual child. It is a book to be read by nurses who contemplate doing work with children.

XIV. TUBERCULOSIS.

CARRINGTON, THOMAS S. *Fresh Air and How to Use It.* Nat. Asso. for Study and Prevention of Tuberculosis, 105 E. 22d St., N. Y., 1912. 241 pp. \$1.00.

Considers the relation of fresh air to health, construction of homes and appliances for promoting fresh air at all times. An excellent book for reference and required reading, especially for public health workers.

HUBER, J. B. *Consumption and Civilization.* Lippincott, 1906. 536 pp. \$3.00.

An able nontechnical discussion of the subject, for the physician and nurse as well as the general reader.

HUTCHINSON, WOODS. *The Conquest of Consumption.* Houghton, Mifflin Co., 1910. 138 pp. \$1.00.

Written for the purpose of rousing public interest in the antituberculosis movement.

KNOFF, S. A. *Tuberculosis, a Curable and Preventable Disease.* Moffat, Yard, 1909. 394 pp. \$2.20.

Written by an authority on the subject. Very simple and practical. A helpful book to put into the hands of patients.

LA MOTTE, ELLEN N. *The Tuberculosis Nurse.* G. P. Putnam's Sons, 1915. 292 pp. \$1.50.

This book is of great value to nurses who are engaged in tuberculosis work and also to those who are directing crusades against tuberculosis. It may be used as a reference for required reading in training schools and should be found in every school library.

OTIS, EDWARD O. *The Great White Plague*. Crowell, 1909. 321 pp. \$1.00.

A clear, concise treatment of the subject for the enlightenment of the general reader. Simple enough for the most unlearned, and yet including the main facts about the disease which should be known by every one.

Proceedings of the Sixth International Congress on Tuberculosis. Washington, D. C., 1908. Philadelphia: Wm. F. Fell Co.

Some Plans and Suggestions for Housing Consumptives. Published by National Association for the Study and Prevention of Tuberculosis, 105 E. 22d St., New York.

A pamphlet containing 95 illustrations and many helpful hints on the sanitary phases of this problem.

(Many other pamphlets for general distribution published by the same association.)

XV. OBSTETRICAL AND GYNECOLOGICAL NURSING AND MIDWIFERY.

1. *Textbooks for Nurses.*

COOKE, JOSEPH BROWN. *A Handbook of Obstetrics for Nurses*. Lippincott, 4th ed., 1909. 386 pp., 174 ill. \$2.00.

A standard textbook on the science and art of midwifery—dealing adequately with the subject both from the scientific and practical point of view. Illustrations are generous and well executed.

DAVIS, EDWARD P. *Obstetric and Gynecologic Nursing*. Saunders, 3d ed., 1908. 436 pp., ill. \$1.75.

A good book for nurses and medical students. Written by a well known specialist.

DELEE, JOSEPH B. *Obstetrics for Nurses*. Saunders, 3d ed., 1908. 512 pp., ill. \$2.50.

A well known and authoritative textbook on the subject. Is specially strong on the nursing care of the baby and the mother.

McFARLANE, CATHERINE. *Gynecology for Nurses*. Saunders, 1908. 150 pp., 70 ill. \$1.25.

A very compact little handbook for pocket reference. Clear and definite, but not exhaustive. A good book for the private nurse.

FULLERTON, ANNA M. (Revised by MACFARLANE, CATHERINE.) *A Handbook of Obstetric Nursing*. Blakiston, 7th ed., 1910 (revised). 272 pp. \$1.00.

A small handbook for nurses, students and mothers, rather more simple and less detailed than most books on the subject.

WILSON, W. REYNOLDS. *A Reference Handbook of Obstetric Nursing*. Saunders, 2d ed., 1911. 355 pp., ill. \$1.25.

A compact little volume of flexible leather binding, containing in condensed form the essentials of obstetric technique and care of mother and child. Handy reference book for the private nurse.

2. *Reference Books.*

KELLY, HOWARD. Medical Gynecology. Appleton, 1908. 662 pp., 163 ill. \$6.00.

KELLY, HOWARD. Operative Gynecology. Appleton, 2 vols. \$15.00.

Much more comprehensive and detailed. Valuable for nurses chiefly on account of illustrations and technique of treatment.

WILLIAMS, J. WHITRIDGE. Obstetrics. Appleton. 820 pp. 630 ill. \$6.00.

A generally recognized authority.

XVI. SKIN DISEASES AND NURSING.

HYDE, JAMES NEVIUS. Diseases of the Skin. Lea & Febiger, 1909. 1126 pp. \$5.00.

A very exhaustive work which may be used solely for reference and for the benefit of the illustrations.

MEACHEN, G. NORMAN. Skin Diseases—Their Nursing and General Management. Scientific Press, 1911. 134 pp. \$1.00.

A small book written by a skin specialist for the use of English nurses. Gives the anatomy and physiology of the skin, a general classification of the commoner skin diseases, causes of cutaneous disorders, constitutional effects, and principles of treatment.

JACKSON, GEORGE T. Handbook of Diseases of the Skin. Lea. 737 pp., ill. \$3.00.

A very complete and authoritative reference book.

SCHAMBERG, JAY FRANK. Diseases of the Skin and Eruptive Fevers. Saunders 2d ed., 1911. 537 pp. \$3.00.

Although not prepared for nurses, it may be used as a reference book. It is exceedingly well illustrated and is not over-technical. It deserves a place in the reference library and will be found very helpful during the course on diseases of the skin.

XVII. EYE, EAR, NOSE AND THROAT—DISEASES AND NURSING.

1. *Textbooks.*

Nursing in Diseases of the Eye, Ear, Nose and Throat. By Committee on Nurses of the Manhattan Eye, Ear and Throat Hospital, New York. Saunders, 1910. 281 pp. \$1.50.

A very practical and comprehensive book, dealing with principles of disinfection, sterilization and operative technique, the general care of patients suffering from diseases of the eye, ear, nose and throat, special methods of handling children, etc. The anatomy of each organ is reviewed separately with the common diseases and injuries of each and the nursing and operative procedures, as followed in the Manhattan Eye and Ear Hospital.

2. Reference Books.

KYLE, J. J. Manual of Diseases of Ear, Nose and Throat. Blakiston, 3d ed., 1911. 670 pp. \$3.00.

One of a series of manuals on various phases of medical practice, designed for ready reference or review. Contains the essentials of diseases and treatment, medical and surgical, of these organs.

MAY, CHARLES H. Manual of Diseases of the Eye. Wood, 7th ed. (revised), 1911. 400 pp. 362 ill. \$2.00.

An invaluable book on diseases and treatment, with most illuminating illustrations, many of them colored, to show the exact appearance of the eye in various stages of disease.

The Students' Quiz Series on Diseases of the Eye, Ear, Throat and Nose. Miller, McElvoy, Weeks, Pub. Lee Bros. & Co., Philadelphia.

XVIII. MENTAL AND NERVOUS DISEASES AND NURSING.*1. Textbooks for Nurses.*

BARRUS, CLARA. Nursing the Insane. Macmillan, 1908. 409 pp. \$2.00.

A very helpful book for nurses and attendants, showing the results of long experience with the insane, and a very sympathetic understanding of the needs and difficulties of the work. The book combines principles and methods of practical nursing, ward management and hygiene, with a brief outline of psychology and mental diseases, symptoms and forms of mental disease and the principles of treatment. The ethical side of nursing in institutions for the insane is strongly and convincingly dealt with, though perhaps in a rather didactic way.

BURR, C. B. A Primer of Psychology and Mental Diseases. Davis, 3d ed., 1906. 183 pp. \$1.00.

A brief and simple outline of the structure and functions of the brain, causes and forms of insanity, and preventive and remedial measures. Written for attendants and nurses.

CHASE, ROBERT H. Mental Medicine and Nursing. J. B. Lippincott Co., 1914. 245 pp. \$1.50.

A textbook that may easily be used by student nurses. It deals with the most common symptoms of insanity and the various forms of disease, with an excellent classification table. The book is well illustrated.

MILLS, CHARLES K. Nursing and Care of the Nervous and the Insane. J. B. Lippincott Co. 147 pp. \$1.25.

Contains the substance of a course of lectures given in the training school for nurses of the Philadelphia Hospital.

2. Reference Books on Nervous and Mental Diseases.

BARKER, LEWELLYS F. The Nervous System. Appleton, 1901. 1120 pp. \$6.00.

A large volume treating of the subject in a detailed and comprehensive way. The author is a well-known specialist in nervous diseases.

CHURCH, A., and PETERSON, F. *Nervous and Mental Diseases*. Saunders, 6th ed., 1911. 945 pp. \$5.00.

A comprehensive modern treatment of the subject. Probably the best all-round reference book.

DUBOIS, PAUL. *Psychic Treatment of Nervous Disorders*. Funk, 1908. 471 pp. \$3.00.

A standard work on the treatment of mental and nervous cases through psychotherapy. Well written, rational and reliable. Though not written for nurses there is much that lies within the realm of nursing in general care and treatment of the patient.

MITCHELL, S. WEIR. *Fat and Blood*. Lippincott, 8th ed. 236 pp. \$1.50.

A well-known book dealing in a clear and simple way with the main points in the care and treatment of the nervous patient. The book has been revised frequently to keep in touch with modern methods.

3. *General Works on Insanity.*

BEERS, CLIFFORD. *A Mind that Found Itself. (An Autobiography.)* Longmans, Green, 2d ed., 1910. \$1.50.

An interesting description of the experience and sensations of one who had been a patient in various institutions for the care of the insane. The immense significance of seemingly unimportant details in treatment, and the great longing for exercise and occupation are emphasized in a striking way. A book which should be read by every nurse.

PUTNAM, D. *Twenty-five Years With the Insane*. 1900.

An interesting outline of the history of insanity and methods of treatment employed in various ages. The causes of insanity are also dealt with and many practical points in the care and treatment of the insane which will be of value to nurses.

WYNTERS, H. P. *Borderland of Insanity*.

A plea for more humane and rational treatment of slight mental disorders. Deals with some of the eccentricities of abnormal mentality, and the training of imbecile children.

XIX. MENTAL HYGIENE AND PSYCHOTHERAPY.

1. *Reference Books.*

CLOUSTON, T. S. *The Hygiene of the Mind*. Dutton, 1907. \$2.50.

A valuable and interesting study of the mind and its functions, emphasizing particularly the forces and methods at our disposal for combating and to a great degree eliminating physical and mental disease. Probably the best book of its kind for all classes of readers.

DUBOIS, PAUL. *Self Control and How to Secure It*. Funk, 1909. \$1.50.

DUBOIS, PAUL. *Influence of the Mind on the Body*. Funk, 1908. 64 pp. \$0.50. Nontechnical, scientific and authoritative.

FOREL, A. H. *Nervous and Mental Hygiene in Health and Disease*. Putnam, 1906. \$2.00.

2. *Books for the Patient and General Reader.*

CALL, ANNIE PAYSON. *Power Through Repose.* Roberts Bros., 1891. \$1.00.

CALL, ANNIE PAYSON. *Everyday Living.* Stokes, 1906. \$1.25.

While not in any sense to be regarded as scientific or philosophical, these little books present an optimistic and wholesome view of life which makes them very helpful to a certain class of perturbed and depressed patients, and others who have started wrong in mental habits.

GULICK, LUTHER H. *The Efficient Life.* Doubleday, 1907. 195 pp. \$1.20.

GULICK, LUTHER H. *Mind and Work.* Doubleday, 1908. 201 pp. \$1.20.

These books contain rational and helpful advice on mental hygiene without the rather morbid or sentimental tone that often gets into this kind of literature.

MITCHELL, JOHN K. *Self-Help for Nervous Women.* Lippincott. 202 pp. \$1.00.

A sane and wholesome book treating of nervousness from the standpoint of the physician.

WALTON, GEORGE L. *Why Worry?* Lippincott, 1910. 275 pp. \$1.00.

WALTON, GEORGE L. *Those Nerves.* Lippincott, 1909. 202 pp. \$1.00.

"The standpoint is that of a smiling stoic, not without sympathy for the ills of humanity and distinctly skillful in the art of cheering people up." Books for entertainment and stimulation rather than for information.

XX. OCCUPATIONS FOR INVALIDS.

1. *General Textbooks.*

TRACY, SUSAN E. *Studies in Invalid Occupation. A Manual for Nurses and Attendants.* Whitcomb and Barrows, 1910. 175 pp. \$1.50.

A very interesting and practical little book describing a great number of methods of entertaining and occupying patients of the most varied types. A new branch of treatment with which every nurse should be familiar.

2. *Books on the Arts and Crafts.*

BINNS, C. F. *The Potter's Craft.* Van Nostrand, 1910. 171 pp. \$2.00.

A practical guide for the studio and workshop.

Embroidery Up-to-Date. Butterick Publishing Co. \$0.25.

COCKERELL, DOUGLAS. *Bookbinding and the Care of Books.* Appleton, 1902. 343 pp. \$1.20.

A book for amateur bookbinders and librarians. Contains carefully detailed instruction.

FREEMAN, SARAH J. *A Syllabus on Elementary Bookbinding.* New York: Teachers College, 1910. 42 pp. \$0.30.

WALKER, LOUISE. *Varied Occupations in String-work.* Macmillan, 1896. 254 pp. \$1.25.

WALKER, LOUISE. *Varied Occupations in Weaving*. Macmillan, 1895. 224 pp. \$1.00.

WHITE, MARY. *How to Make Pottery*. Doubleday, 1904. 179 pp. \$1.00.

WHITE, MARY. *How to Make Baskets*. Doubleday, 1901. 194 pp. \$1.00.
A book for the teacher of basketry or the craft-worker. The processes are clearly described and well illustrated.

3. *Children's Plays and Occupations*.

HOLTON, A. H., and ROLLINS, A. F. *Industrial Work for Public Schools*. Rand, McNally, 1904. 134 pp. \$0.90.

HOXIE, JANE L. *Suggestions for Handwork in School and Home*. Milton Bradley Co. 223 pp. \$0.75.

POULSON, EMILIE. *Finger Plays*. Lothrop, Lee and Shepard Co. \$1.25.

SAGE, ELIZABETH, and COOLEY, ANNA M. *Occupations for Little Fingers*. Scribner, 1905. 154 pp. \$1.00.
This is a small manual for grade teachers, mothers and settlement workers, showing numberless useful and fascinating things that may be fashioned by children out of inexpensive materials. Very suggestive for the private nurse.

TALBOT, MARY WHITE. *The Child's Rainy Day Book*. Doubleday, 1905. 215 pp., ill. \$1.00.

XXI. MATERIA MEDICA AND THERAPEUTICS.

BLUMGARTEN, A. S. *Materia Medica for Nurses*. Macmillan, 1915. 644 pp., ill. \$2.50.
While a strictly scientific textbook, it makes the subject of *materia medica* very interesting to the student. It does not follow the usual method of presenting lengthy technical details, but the subject matter is placed in plain, simple English, with good logical classification. It is a large, heavy book and is difficult to use for an everyday textbook; aside from this, it is a most valuable work for nurses.

DOCK, LAVINIA. *A Textbook of Materia Medica for Nurses*. Putnam, 1900. \$1.50.
A well-known and widely used textbook which contains in condensed form, the essential facts concerning drugs with which nurses should be familiar. A reliable and standard textbook.

FOOTE, JOHN. *Essentials of Materia Medica and Therapeutics for Nurses*. Lipincott, 1910. 194 pp. \$1.25.
This book varies little from the other books on *materia medica* for nurses. The chapter on "How Medicines Act" is a commendable departure, though one could wish it more comprehensive.

GROFF, JOHN E. *Materia Medica for Nurses*. Blakiston, 6th ed., 1911. 233 pp. \$1.25.
An epitome of common drugs and chemicals giving medicinal uses and doses arranged according to therapeutic action. A special feature is the introductory chapter on the chemistry of drug preparations.

PAUL, GEORGE P. A Textbook of *Materia Medica* for Nurses. Saunders, 2d ed., 1911. 282 pp. \$1.50.

Drugs are here arranged alphabetically in very condensed form. The chapters at the end on hydrotherapy, topical medication, serums, diet, rest treatment, etc., are helpful though by no means comprehensive. The treatment of therapeutics in childhood and infancy is a welcome feature.

STIMSON, JULIA C. Nurses' Handbook of Drugs and Solutions. Whitcomb & Barrows, 2d ed., 1911. 82 pp. \$1.00.

A very practical little book, written by a nurse for the use of students of nursing. It deals with the common drug combinations in daily use in hospitals, and gives some very helpful suggestions regarding the administration of medicines, the preparation of solutions, etc. The therapeutic action of drugs is treated very briefly.

STONEY, EMILY, A.M. Practical *Materia Medica* for Nurses. Saunders, 3d ed., 1906. 300 pp. \$1.50.

2. *Reference Books.*

HARE, HOBART AMORY. Practical Therapeutics. Lea, 1911. 941 pp. 122 ill. \$4.00.

A standard work by a well-known author, dealing with drugs and other remedial agents from the standpoint of their action in disease. The treatment in detail of such nursing measures as baths, hot and cold applications, counter-irritants, enemata, etc., make the work of special value to the teacher of nurses. The diagrams are original and striking and give excellent suggestions for blackboard work.

HARE, H. A. (*Editor.*) Modern Treatment. The Management of Disease with Medicinal and Nonmedicinal Remedies. By eminent American and English authorities. Lea, 1911. 2 vols. 1800 pp. \$6.00 per vol.

Even more comprehensive and complete than the preceding. Vol. I deals with all the different kinds of treatment; Hydrotherapy, Serumtherapy, Drugs, Electrotherapy, etc., and takes up the application of these to the treatment of Infectious Diseases. Vol. II includes General Medical Diseases, Obstetrics and Gynecology, Eye, Ear, Nose and Throat, etc. It is a library in itself and every subject is treated by a competent authority.

STEVENS, A. A. Modern *Materia Medica* and Therapeutics. Saunders, 5th ed., 1909. 675 pp. \$3.50.

A reliable and comprehensive book which deals with other remedies besides drugs—electricity, heat, cold, etc. While primarily a book for physicians, these points make it valuable as a reference book for nurses.

TANNER, T. H. (Revised by LEFFMANN, HENRY.) Poisons. Blakiston, 11th ed., 1911. 175 pp. \$0.75.

Condensed and reliable information on the common poisons, and their antidotes and methods of treatments in poisoning cases.

3. *General Reading.*

SAINTSBURY, HARRINGTON. *Drugs and the Drug Habit.* Dutton, 1909. 307 pp. \$2.50.

A well-written book for general reading, dealing with the history of therapeutics, the various schools of medical practice, the general effects of drugs on the system, the rational basis of treatment, and the physiological and psychological features of the drug habit. An excellent and very entertaining book for supplementary reading.

Nostrums and Quackery. The American Medical Association, 1912. 500 pp. 200 ill. \$1.00.

A reprint of articles which originally appeared in the Journal of the American Medical Association exposing the patent medicine evil.

XXII. MASSAGE, MECHANOTHERAPY, HYDROTHERAPY AND EXERCISE.

1. *Massage.*

CYRIAX, EDGAR. *Kellgren's Manual Treatment.* Wood. \$4.00.

Highly recommended textbook on Massage. Scientific and reliable.

KELLOGG. *The Art of Massage.* Good Health Publishing Co., Battle Creek, Mich., 8 vo. 240 pp. \$2.50.

Includes a brief history of massage, its physiologic effects on the body and its application in the treatment of disease. The various procedures of massage are described in detail together with the physiologic effects of each. The work is fully illustrated.

2. *Hydrotherapy.*

ABBOTT, GEORGE KNAPP. *Technique of Hydrotherapy and Swedish Massage.* The College Press, Loma Linda, Cal., 3d ed., 1912. 126 pp. \$0.30.

A small handbook but containing much valuable information on procedures in every treatment—the principal effects and uses of each treatment are also given. The descriptions of technique are concise, definite and yet complete.

BARUCH, SIMON. *Principles and Practice of Hydrotherapy.* Wood, 1908. 544 pp. \$4.00.

This book deals with water as a therapeutic agent, the principles and procedures followed in various treatments and the application of these methods to treatment of various diseases. The author is a recognized authority on this subject.

HINSDALE, GUY. *Hydrotherapy.* Saunders, 1910. 466 pp. \$3.50.

A very comprehensive recent work dealing with the different hydrotherapeutic treatments as followed in various countries, the principles involved, and the technique of the procedures. The book is attractively and profusely illustrated.

3. *Mechanotherapy and Exercise.*

McKENZIE, R. TAIT. *Exercise in Education and Medicine.* 346 ill. \$3.50.

A comprehensive and reliable book on the subject, well illustrated, and containing up-to-date methods of treatment in orthopedic cases, as well as in the general field of physical education.

MITCHELL, JOHN K., and GULICK, LUTHER HALSEY. *Mechanotherapy and Physical Education.* Blakiston. 455 pp. 269 ill. \$3.00.

Includes treatment of massage, exercise, etc., with special systems of physical development, orthopedic apparatus, and surgery.

XXIII. HISTORY OF NURSING AND HOSPITALS.

1. *History of Nursing.*

HAMILTON, ANNA. *Considerations sur les Infirmières des Hôpitaux*, 1900.

A history of nursing in France showing the development of nursing under religious orders up to the establishment of modern nursing systems under municipal government.

NUTTING, M. ADELAIDE, and DOCK, LAVINIA L. *History of Nursing.* Putnam, 4 vols. \$5.00.

A comprehensive study of the development of nursing, showing the earlier forms of nursing activities in different lands, the rise of the sisterhoods and nursing orders, the development of hospitals and the earlier methods of organization and administration. The second volume treats almost entirely of the work of Florence Nightingale and modern developments in nursing. The third volume deals with contemporary nursing history in different countries, and the fourth with nurse registration and present day work.

TOOLEY, SARAH A. *History of Nursing in the British Empire.* Bousfield, 1906. 392 pp. \$1.80.

A well arranged survey of nursing in England during the nineteenth century, giving detailed accounts of the most important institutions, and showing the main lines of progress and development.

2. *History of Hospitals.*

BURDETTE, HENRY C. *Hospitals and Asylums of the World.* Scientific Press, 1893. 944 pp. \$3.50.

A very comprehensive study of the history and development of hospitals, problems of planning, government and support, internal administration, etc.

CARLISLE, ROBERT. *Bellevue Hospital, An Account of.* Pub. by the Society of the Alumni of Bellevue Hospital, New York, 1893. 376 pp.

A history of Bellevue, one of the oldest hospitals in America, from its origin in the New York City Almshouse, 1658 to 1893. A carefully prepared list of the staff of physicians and surgeons during this period is included.

CLAY, ROTHERA MARY. *The Medieval Hospitals of England.* Methuen, 1909. 357 pp. \$1.80.

An extensive study of the English hospitals of the middle ages, showing their place in religious and social life and clearly setting forth the charitable and philanthropic spirit and customs of the day. The book is amply illustrated, and many hitherto unknown sources of information have been opened up. Of great value to the student are the tabulated list of hospitals in the appendix and a carefully selected bibliography.

MORTON, THOMAS. *History of the Pennsylvania Hospital from 1751 to 1895.* Authorized by the Board of Managers, Philadelphia, 1897.

MORRIS, E. W. *The London Hospital.* Arnold, 1910. 296 pp. \$1.75.

XXIV. BIOGRAPHY AND MISCELLANEOUS ESSAYS.

1. *Biography.*

COOK, SIR EDWARD. *Life of Florence Nightingale.* Vol. II. Macmillan, London, 1914. \$7.50.

This has been written as a memoir from letters, papers and manuscripts left by Miss Nightingale. Consequently it is filled with her interesting letters, notes, etc. The work enters into very minute detail of her life and works and also of the conditions of the English army at that time. It is very full of interest and particularly so for nurses. It is recommended for school libraries. The most authoritative biography of Miss Nightingale.

KELLY, H. A. *Walter Reed and Yellow Fever.* McClure, Phillips, 1906. 293 pp. \$0.75.

A thrilling story of the heroic labors of Dr. Reed and his associates in pursuit of their investigations into the cause of yellow fever in Cuba.

LOCY, WM. A. *Biology and Its Makers.* Holt, 2d ed., 1910. 469 pp. \$2.75.

Harvey, Pasteur, Lister, Darwin, and many other great names appear, with interesting descriptions of their epoch-making discoveries.

Memorials of Agnes Elizabeth Jones—by her sister—with an introduction by Florence Nightingale. London: Nisbet & Co., 14th ed., 1868. 486 pp. \$0.50.

A notable work describing the unusual character and services of this pioneer of workhouse nursing. The introduction is thoroughly characteristic of Miss Nightingale; a splendid testimony to one of the very greatest of modern nurses.

OSLER, WILLIAM. *An Alabama Student and Other Biographical Essays.* Oxford Univ. Press. \$2.00.

Suggestive incidents in the lives of obscure and famous leaders in medical and scientific thought.

POLLARD, ELIZA. *Life of Florence Nightingale.* Partridge. 160 pp. \$0.50.

A narrative giving many intimate and personal details of Florence Nightingale's early life and work.

RATHBONE, ELEANOR F. William Rathbone, a Memoir. Macmillan, 1908. 493 pp. 2s. 6d.

A worthy tribute to one of the staunchest supporters of nursing ideals. It presents the wide range of his public and social services, of which nursing was but one. One chapter gives an historical account of the development of district nursing.

RICHARDS, LINDA. Reminiscences of Linda Richards. Whitcomb and Barrows, 1911. 121 pp. \$1.00.

A brief autobiography of one of the pioneer nurses of the country, showing her contributions to training school development and to hospital and nursing reform.

TIFFANY, FRANCIS. Life of Dorothea Lynde Dix. Houghton, Mifflin, 1896. \$1.50.

Giving a history of her investigations and the reforms instituted in American prisons, almshouses and hospitals in the early part of the nineteenth century.

TOOLEY, SARAH. Life of Florence Nightingale. Bousefield, 1905. 344 pp. \$1.75.

A most complete and authoritative work on Florence Nightingale's life.

VALLERY-RADOT, RENE. Life of Pasteur. Doubleday, 1910. 483 pp. \$2.50.

2. *Miscellaneous Essays.*

ALLBUTT, THOMAS C. The Historical Relations of Medicine and Surgery. Macmillan. \$1.00.

An interesting theory of the development of modern medical science, through the use of the human hand. Gives fascinating glimpses into the history of the healing art, both medical and surgical.

BROWNE, SIR THOMAS. Religio Medici. Putnam's or Dutton's Classics. \$0.75.

A unique little volume of essays by one of the old masters both in English literature and medieval medicine. Either in the original Old English or the modernized form, it is delightful reading.

HILL, HILBERT WINSLOW. The New Public Health. Minnesota State Board of Health, 1914. 128 pp. \$0.25.

An excellent general statement of the principles of the new practice in public health work. It should be read by public health nurses.

HOLMES, OLIVER WENDELL. Medical Essays. Houghton, Mifflin, 1891. 445 pp. \$1.50.

A classic in medical literature, which contains many chapters that are of peculiar significance to nurses.

OSLER, WILLIAM. Acquaintance. Blakiston, 2d ed., 1906. 475 pp. \$2.25.

A series of charming essays and addresses, delivered before medical bodies, to students, and nurses—all of them inspiring and suggestive. Problems of medical and nursing ethics are treated in the light of a broad, philosophical and yet practical idealism.

PAGET, S. Confessio Medici. Macmillan, 1908. \$1.25.

A series of essays giving fascinating glimpses of the inside of hospital life in old London. The style is charming.

XXV. HOSPITALS—THEIR CONSTRUCTION, ORGANIZATION AND ADMINISTRATION.

AIKENS, C. A. (*Editor*). Hospital Management. Saunders, 1910. 435 pp. \$3.00.
A collection of articles by experienced superintendents and executives dealing with the administration of different hospital departments, buying, furnishing, finances, etc.

AIKENS, C. A. Hospital Housekeeping. Del. T. Sutton, 1906. 162 pp. \$1.25.
A small volume on the domestic management of hospitals, designed to afford practical aid to those charged with the housekeeping problems.

ALLEN, WM. H. Efficient Democracy. Dodd, 1907. 343 pp. \$2.00.

A criticism of the methods employed in hospitals, children's homes, schools and other public and philanthropic institutions. Contains some practical suggestions for improvement.

BURDETTE, HENRY C. Hospitals and Asylums of the World. See page 34.

Hospital Accounting and Statistics, by Representatives of New York Hospitals. Thompson, Brown Co., 1908. 78 pp. \$1.25.

A recent valuable contribution to the organization of hospital finances.

Hospitals, Dispensaries and Nursing. Papers and Discussions in the International Congress of Charities, Correction and Philanthropy, Sec. III. Chicago, 1893. Edited by J. S. Billings and H. M. Hurd. Scientific Press, 1894. 719 pp. 21s. 6d.

Particularly interesting from the fact that nurses for the first time in history are represented in a convention for the discussion of hospital problems.

Hospital Plans. Five essays relating to construction, organization, and management of hospitals, with plans by John S. Billings and other authorities. Wood, 1875. 342 pp.

Prepared for the trustees of the Johns Hopkins Hospital and embodying the opinions of the most eminent medical men of the day on this subject.

Hospital Expenditure. The Commissariat, reprinted from "The Hospital." The Scientific Press, 1898. 2s. 6d.

NIGHTINGALE, FLORENCE. Notes on Hospitals. London: Parker & Sons, 1859. 110 pp.

One of the earliest authoritative studies of hospital sanitation including evidence given before the Royal Commission on the Sanitary State of the Army. A standard book on essentials in hospital construction and sanitation.

NIGHTINGALE, FLORENCE. Notes on Hospitals. Longmans, Green, 3d ed., 1863. 187 pp.

A revised and enlarged edition of the Notes, with chapters on Convalescent and Children's Hospitals, and a valuable appendix on different systems of nursing.

NIGHTINGALE, FLORENCE. Introductory Note on Lying-in Institutions. Longmans, Green, 1871. 110 pp.

A study of conditions in Lying-in Hospitals together with a proposal and plans for organizing a Training Institution for Midwives.

OCHSENER, ALBERT J., and STURM, MEYER J. *The Organization, Construction and Management of Hospitals.* Cleveland Press, 1909. 654 pp. \$7.00.

An important book on hospitals dealing exhaustively and authoritatively with the problems of planning, construction, equipment and appurtenances. The introductory chapters are devoted to questions of organization and management.

XXVI. DISTRICT OR VISITING NURSING.

Hints on How to Start a District Nursing Association. By a county superintendent. Scientific Press. 20 pp. 1s.

A pamphlet of helpful suggestions with special application to English conditions and needs.

RAVEN, MRS. DARCE. *A Guide to District Nurses.* Macmillan, 1889. 137 pp. 2s. 6d.

One of the earliest manuals of district nursing prepared for the Queen Victoria Jubilee Institute.

FOLEY, EDNA L. *Visiting Nurse Manual.* Published by V. N. A., 104 S. Michigan avenue, Chicago. \$0.25.

A small pamphlet easily carried in the visiting nurse's bag. It is full of interesting and necessary information for every-day work.

The Organization of Nursing in a Large Town. With an introduction and notes by FLORENCE NIGHTINGALE. A. Holden, 1865. 103 pp. 2s. 6d.

This little book gives very definite advice regarding the organization of district nursing, as well as hospital training. It met with Miss Nightingale's hearty endorsement.

NIGHTINGALE, FLORENCE. *Rural Hygiene.* Spottswode, 1894. 27 pp. (Pamphlet.)

A carefully organized plan for the introduction of trained nurses, as teachers of hygiene and as sanitary inspectors, in the rural districts. An important early contribution on this subject.

2. Books for Reference and General Reading.

DOCK, L. L. *Short Papers on Nursing Subjects.* New York: M. Louise Longeway, 1900. 57 pp. \$0.50.

Contains a paper on the history and organization of the Henry Street Nurses Settlement, New York.

MISS MARY LOANE, the author of the six books in the appended list, is a district nurse who has lived and worked among the poor and for the poor. Her ideas of their lives, habits, and thoughts show great insight, a clear grasp of realities, extensive knowledge, acute and accurate observations. The books are invaluable for nurses and social workers. Chapters of special importance are indicated in one or two volumes. The series is published by Edward Arnold, London:

The Queen's Poor, 1905. 312 pp. 6s. Special chapters: A day with the District Nurse, State-Spread Tables.

The Next Street But One, 1907. 309 pp. 3s. 6d. Ethics of the Poor, Interdependence, Home Industries and Their Effect on the Home.

From Their Point of View, 1908. 309 pp. 6s. Causes of Infant Mortality, The Cost of Food, The Art of Repairing.

An Englishman's Castle, 1909. 308 pp. 6s. The Service of the Poor, The Social Services of the District Nurse.

Neighbors and Friends, 1910. 322 pp. 6s. Voluntary Workers, Report of the Poor Law Commission.

The Common Growth, 1911. 304 pp. The Cost of Idleness, Patients and Politics, Family Socialism.

Titania. Nursing Among the Poor. Strangeways. 16 pp. (pamphlet).

A plea for the highest type of nurse in district fields, with personal reminiscences.

WATERS, Y. G. Visiting Nursing in the United States. Charities Publication Committee, 1909. 367 pp. \$1.25.

Furnishes a very brief historical sketch and a complete tabulation of organizations of district nursing throughout the country.

The Visiting Nurse. The spread of a social vocation through city, town and country. Charities and the Commons, April 7, 1906. pp. 10-70. Charities Publication Committee.

A historical survey of district and school nursing by various prominent workers.

WALD, LILLIAN D. The House on Henry Street. Henry Holt & Co., N. Y., 1916. \$2.00.

Is the story of the establishment of the famous settlement on the East Side of New York, known as the Henry Street Settlement. Miss Wald by her genius, coupled with her nursing experience and nurse's instinct, has, for twenty years, demonstrated what can be done in making good American citizens from the immigrant population of the East Side. This is told in a most intensely interesting manner and holds the attention of the reader from first to last. It is of interest, not only to those who are doing like work, but to all who are working for the betterment of others. This book is recommended for required reading in schools for nurses.

For important articles and discussions on this subject see Periodicals and Reports of Nursing Organizations.

See, also, School Nursing and Hygiene, Philanthropy and Social Reform.

XXVII. SCHOOL NURSING AND MEDICAL INSPECTION IN SCHOOLS.

ALLEN, WM. H. Civics and Health. See p. 43.

AYRES, LEONARD P. Open Air Schools. Doubleday, 1910. 170 pp. \$1.20.

A summary of the arguments for the open air school, the history of the movement, general methods of dealing with pretubercular and anæmia children, and the results so far obtained.

CORNELL, WALTER S. Health and Medical Inspection of School Children. Davis, 1912. 600 pp. \$3.00.

A recent book dealing with the history and scope of medical inspection, principles of school hygiene, defects and diseases usually met with in the school and the various systems in vogue for dealing with these conditions effectively. The book is fully illustrated.

GULICK, LUTHER H., and AYRES, LEONARD P. Medical Inspection of Schools. Charities Publication Committee, 1908. 276 pp. \$1.00.

Gives a good account of the nature and aims of medical inspection of school children, a history of the movement in various countries, and a discussion of the work of the school nurse, teacher and physician.

HOGARTH, A. H. Medical Inspection of Schools. Oxford Univ. Press, 1909. 360 pp. \$2.00.

A general discussion of the aims and methods of medical inspection particularly as carried out in schools of Great Britain. The work of the school nurse receives thorough and sympathetic treatment.

HOAG, ERNEST BRYANT. The Health Index of Children. San Francisco: Whitaker & Ray-Wiggin Co., 1910. \$1.00.

Recommended as a good handbook for the use of school nurses.

NUTTING, M. ADELAIDE, and STEWART, ISABEL M. The Nurse in Education. Part II. Ninth Year Book of the National Society for the Study of Education. Univ. of Chicago Press, 1911. 76 pp. \$0.75.

A summary of the history and development of school nursing, with some estimate of the economic and educational value of the school nurse, and the lines along which further development is needed. Contains a bibliography of books and articles on school nursing.

RAPEER, LEWIS W. School Health Administration. Teachers College, Columbia University, 1913. 358 pp. \$2.15.

Treats of medical inspection of schools and is in part a survey of the work accomplished by medical inspection and school nursing in twenty-five cities. It can not fail to be of great interest to school nurses.

WOOD, THOMAS D. Health and Education. Part I. Ninth Year Book of the National Society for the Study of Education. Univ. of Chicago Press, 1909. \$0.75.

A review of the various phases of medical inspection, school sanitation, health instruction and physical education in schools from the viewpoint of modern psychology and hygiene. Contains a bibliography of books and periodicals dealing with these subjects.

XXVIII. RED CROSS AND ARMY NURSING.

BOARDMAN, MABEL. Under the Red Cross Flag at Home and Abroad. J. B. Lippincott Co., 1916. 333 pp. \$1.50.

A history of the organization, present activities, and possibilities of the Red Cross. This is an intensely interesting book for nurses, as also laymen, and to all who are awake to one of the greatest forces for betterment at the present time.

MOYNIER, GUSTAV. The Red Cross—Its Past and Its Future. London, Paris, and New York, 1883.

Deals with the origin and the development of the Red Cross. Written by one of the founders.

XXIX. STATE REGISTRATION FOR NURSES.

BOYD, LOUISE CROFT. State Registration for Nurses. Saunders, 1911. 42 pp. \$0.50. 2d ed. enlarged. \$1.25.

A pamphlet giving a summary of the laws in the various states, registration requirements, exemptions and restrictions, basis of reciprocity between states, etc. There is a full bibliography at the end which will be of assistance to any one who wishes to investigate the subject further.

XXX. PSYCHOLOGY AND EDUCATION.

1. General.

BUTLER, N. M. The Meaning of Education. Macmillan, 1900. 230 pp. \$1.00.

A series of essays on the general field of education. The introductory essay on "What knowledge is of most worth" has very definite suggestions for those who are in the field of vocational education.

DAVENPORT, EUGENE. Education for Efficiency. Heath, 1909. 184 pp. \$1.00.

A strong presentation of the principles underlying the training of efficient workers, particularly in the practical vocations. The book will be highly suggestive to all who are interested in progressive methods in the training school.

DEWEY, JOHN. Moral Principles in Education. Houghton-Mifflin. 60 pp. \$0.35.

A discussion of the ethical principles underlying all education. Though dealing primarily with the training of children a very direct application can be made to the training of adults. Dr. Dewey's treatise will throw some light on the much discussed question of "Discipline."

DEGARMO, CHARLES. Interest and Education. Macmillan, 1902. 226 pp. \$1.00.

Deals with the sources of interest and attention, and the best means of securing these essential factors in effective teaching.

ELIOT, CHARLES W. *Education for Efficiency and the New Definition of the Cultivated Man.* Houghton-Mifflin, 1909. 55 pp. \$0.35.

These two short essays, written by one of America's foremost educators, set forth very clearly the modern conception of the aims and purposes of education. "Efficiency" he defined as "effective power for work and service during a healthy, active life" and it is with the training and development of this power and its application to the various forms of industrial and professional activity and national service, that Dr. Eliot deals in the first essay. The second essay suggests some new standards of culture and the means for their attainment.

JAMES, WILLIAM. *Psychology—Briefer Course.* Holt, 1909. 468 pp. \$1.60.

An introductory textbook on psychology by an eminent psychologist. Chapters on Habit, the Self and Will are especially illuminating and suggestive. The book will be valuable as a reference book, in the study of ethics and education as well as in the care and treatment of mental disorders.

JAMES, WILLIAM. *Talks to Teachers on Life Ideals.* Holt, 1899. 301 pp. \$1.50.

A simple and practical presentation of many of the important facts of psychology and philosophy. Contains suggestive and illuminating interpretations of human nature which will be of much interest and value to nurses as well as to teachers.

MACMURRY, FRANK M. *How to Study and Teaching How to Study.* Houghton-Mifflin, 1909. 330 pp. \$1.25.

A thorough and systematic discussion of the problem of teaching children to study intelligently and economically. The principles of definite and clear thinking are, however, the same for all students, so that the book will prove helpful and suggestive to every one who is interested in acquiring good habits of study, and to all teachers who want to make their teaching vital and effective.

NICHOLSON, ANNA. *What Constitutes Good Teaching.* Report of Nat. League of Nursing Education, Teachers College, Columbia University, N. Y., 1915. Paper, \$0.50; cloth, \$1.24.

An article on teaching in general with special references to teaching in training schools. This very able, scholarly paper will be of great assistance, especially to the young teacher of nurses. Other articles contained in the report are also of value.

PALMER, GEORGE H., and FREEMAN, ALICE. *The Teacher.* Houghton-Mifflin, 1908. 395 pp. \$1.50.

A series of essays by two master teachers and thinkers, dealing in a large way with educational problems and ideals.

SNEDDEN, DAVID. *The Problem of Vocational Education.* Houghton-Mifflin, 1911. 86 pp. \$0.35.

A very clear and forcible presentation of the modern point of view in vocational education. Gives a broad outlook of the history, aims, purposes, methods and scope of the newer types of vocational schools. The volume is small but comprehensive, and will be highly suggestive to training school superintendents and teachers.

SNEDDEN, DAVID. *Problems of Educational Readjustment*. Houghton, Mifflin Co., 1913. \$1.50.

This is a study of educational problems and processes to fit the demands of today. It is a book that may be read by instructors of nurses with benefit in adjusting the educational viewpoint in application to the teaching of nurses.

SPENCER, HERBERT. *Education*. Appleton, 1896. 283 pp. \$1.25.

A series of notable essays on education. The writer strongly advocates health preservation and training of children as subjects of study for women, and criticizes much of the fashionable education of his day.

SWIFT, E. J. *Mind in the Making*. Scribner, 1908. 329 pp. \$1.35.

A discussion emphasizing the need of personal contact between pupils and teachers. It contains excellent accounts of the learning process and the various pathological tendencies that may arise in school children. A very sensible and stimulating work.

TALBOT, MARION. *The Education of Women*. Univ. of Chicago Press, 1910. 246 pp. \$1.25.

The problems of the education of girls and young women in elementary, secondary and collegiate courses are presented, and solutions pointed out by the Dean of Women of Chicago University.

THORNDIKE, E. L. *Human Nature Club*. Longmans, Green, 1901. 231 pp. \$1.25.

Introduces many of the common facts of psychology in a simple and entertaining form.

THORNDIKE, E. L. *Elements of Psychology*. Seiler, 1905. 342 pp. \$1.25.

A textbook of Psychology for teachers, dealing with the structure of the brain and development of the mental faculties and the laws of its efficient functioning.

THORNDIKE, E. L. *Principles of Teaching*. Seiler, 1906. 290 pp. \$1.25.

A book which applies the principles of psychology to actual teaching.

2. *Nurses' Education*.

NUTTING, M. ADELAIDE. *The Educational Status of Nursing*. U. S. Bureau of Education. Government Printing Office, Washington, D. C., 1912.

A statistical and general report of the present situation in nurses' education, dealing with educational and other standards of admission, hours of practical and theoretical work, methods of instruction, equipment and other related problems. The demands of modern nursing and the reconstruction and development in the system of education made necessary by changed conditions are discussed.

ROBB, ISABEL HAMPTON. *Educational Standards for Nurses*. Koechert, 1907. 366 pp. \$2.00.

A notable collection of addresses and articles on the education of nurses and on their professional and social relations. Of special importance are the two contributions on Educational Standards and the Three Years' Course.

The Education of Nurses and the Function of the Hospital. Teachers College Record, Vol. XI, No. 3, June, 1909. Address Teachers College Record, 525 W. 120th St., N. Y. C. \$0.30.

Reports of the U. S. Bureau of Education, Washington, D. C. Statistics of Professional and Allied Schools. (Free.)

Annual Reports of the National League of Nursing Education. Teachers College, New York. \$0.50 and \$1.25.

XXXI. ETHICS.

1. *Nursing Ethics.*

AIKENS, C. A. Studies in Ethics for Nurses. Saunders, 1916. 313 pp. \$1.75.

This book presents the difficult subject of ethics in an unusual but effective manner. The author emphasizes her points by some very fine and practical illustrations from actual problems, to some extent, from her own experiences, which should be a guide for instructors of nurses.

DOCK, L. L. Short Papers on Nursing Subjects. M. Louise Longeway, 1900. 57 pp. \$0.50.

A small pamphlet containing, among other things, a suggestive paper on "Ethics or a Code of Ethics."

ROBB, ISABEL HAMPTON. Nursing Ethics. Savage, 1903. \$1.35.

A uniquely valuable little book for nurses, taking up intimately their personal and professional relationships, and giving helpful guidance toward a high ethical standard of life and conduct.

DEWITT, KATHERINE. Private Duty Nursing. J. B. Lippincott, 1913. 244 pp. \$1.50.

This book is full of valuable advice given out of the actual experience of the author. The many phases of the work of a private duty nurse are intimately discussed, including the question of contagious disease, hotel life and traveling with the patient. The private duty nurse needs the book and it should be included in required reading for student nurses.

LOUNSBERRY, HARRIET CAMP. Making Good on Private Duty. Lippincott. 208 pp. \$1.10.

This book deals with the human side of the nurse's relations to her patient, the doctor, the patient's family and the nurse's own personal problems. It contains many of the small yet important points that a nurse must know and are not always found in the usual textbook of nursing. A nurse should not fail in accepting its guidance.

PARSONS, SARA E. Nursing Problems and Obligations. Whitcomb & Barrows, 1916.

A most valuable contribution to nursing literature. While a portion of the book is given to nursing ethics, the range is broader, and in a series of familiar talks the position of the nurse, not only in her professional but as a working member of the community, is discussed in helpful detail.

2. *General Ethics.*

CABOT, E. L. *Every-Day Ethics.* Holt, 1906. 439 pp. \$1.25.

A simple, direct and practical treatment of the subject.

DEWEY, J., and TUFTS, J. H. *Ethics.* Holt, 1908. 618 pp. \$2.00.

A very comprehensive though not abstruse presentation of the subject from the standpoint of history, philosophy, and sociology.

MACGUNN, J. *The Making of Character.* Macmillan, 1900. 226 pp. \$1.75.

A nontechnical and very suggestive book presenting clearly and simply, some of the great principles of good living, based on sound psychology and philosophy.

PALMER, G. H. *Nature of Goodness.* Houghton-Mifflin, 1903. 147 pp. \$1.10.

An interpretation of philosophy by an eminent teacher of ethics and master of English style.

XXXII. SOCIOLOGY AND ECONOMICS.

1. *General Sociology.*

COOLEY, CHARLES HORTON. *Social Organization.* Scribner, 1911. 426 pp. \$1.50.

COOLEY, CHARLES HORTON. *Human Nature and the Social Order.* Scribner, \$1.50.

These books deal with the nature of man in society in all the phases of growth, organization, activities, institutions, etc.

DEVINE, EDWARD T. *The Normal Life.* The Survey, 105 E. 22d street, New York. 1915. 222 pp. \$1.00.

As the title of this little book implies, it deals with the normal life of infancy, childhood, youth and maternity. The great truths surrounding the various periods of life are here very simply stated. The development of character in the different periods and causes bearing on development are interestingly stated. It is a useful book for teachers and for those interested in children's work.

ELLWOOD, CHARLES A. *Sociology and Modern Social Problems.* American Book Co., 1913.

Outlines a most interesting study of society and of the bearing of modern psychology upon social problems. It is a book that may be used in parts for required reading.

GIDDINGS, FRANKLIN HENRY. *Elements of Sociology.* Macmillan, 1910. 353 pp. \$1.10.

Everything Dr. Giddings writes is comprehensive, suggestive and authoritative. This elementary textbook gives the fundamental principles of sociology in an interesting and untechnical form.

LEBON, GUSTAVE. *The Psychology of Peoples.* Macmillan, 1899. 236 pp. \$1.50.

Interesting accounts of the psychic traits of various peoples and their relation to human institutions.

ROSS, EDWARD A. *Social Psychology.* Macmillan, 1908. 372 pp. \$1.50.

This is not a technical social psychology, but deals with topics of such general interest as imitation, custom, habit, etc.

2. *Medical Sociology.*

CABOT, RICHARD C. Social Service and the Art of Healing. Moffat, Yard, 1909. 192 pp. \$1.00.

The author argues that the functions of hospitals must extend beyond the mere physical care of patients in order to justify their cost of maintenance.

CANNON, IDA M. Social Work in Hospitals. Russell Sage Foundation, 105 E. 22d street, N. Y., 1913. 257 pp. \$1.50.

This contains a history of hospital social service work, and then takes up a study of the medical and social problems in connection with the patients. The author is one of the pioneers in the work and writes from out of her own experience in connection with her work at the Massachusetts General Hospital, Boston. It is an interesting book, not only for nurses but for others interested in the social service work in a county or city hospital.

RHODES, GEOFFREY (*Editor*). Medicine and the Church. Kegan Paul & Co., 1910. 6s. net.

A series of papers by authoritative writers collected in book form, characterized throughout by a temperate and reasonable tone.

3. *Economics.*

ELY, RICHARD T. Outlines of Economics. Macmillan, 1903. 426 pp. \$1.25.

An authoritative textbook for college students. Contains a valuable bibliography and prescribed courses of reading.

VEILLER, LAWRENCE. Housing Reform. Charities Pub. Com., 1910. 213 pp. \$1.25.

A study of the question of housing, given in an interesting way, suitable for public health nurses.

XXXIII. PHILANTHROPY AND SOCIAL REFORM.

ADDAMS, JANE. The Spirit of Youth and the City Streets. Macmillan, 1909. 162 pp. \$1.25.

A study of the forms of expression which the instincts of sex and of play take in the artificial environments of the American city street. Elementary, with illustrative quotations from wide experience.

ADDAMS, JANE. Democracy and Social Ethics. Macmillan, 1902. 281 pp. \$1.25.

A forceful exposition of the new duties created by a new social world. "The essential idea of democracy becomes the source and expression of social ethics" (p. II).

ADDAMS, JANE. Twenty Years at Hull House. Macmillan, 1911. 551 pp. \$2.50.

BOOTH, CHARLES. Life and Labor of the People in London. Macmillan, 1902. Especially Vol. I, Part 1, \$2.00.

An extraordinary presentation of the conditions of the poor in London.

BOSANQUET, HELEN. *The Strength of the People. A study in social economics.* Macmillan, 1902. 345 pp. \$2.75.

Mrs. Bosanquet first states in a generalized form the social problem as she sees it and proceeds to show that "it is not poverty but want of 'interests'" that has been the cause of social misery, and that the development of the sense of responsibility in the individual is the thing that is necessary to solve these problems.

DEVINE, EDWARD T. *Misery and Its Causes.* Macmillan, 1909. 274 pp. \$1.25.

A summary of conditions which make misery, especially those generally beyond individual control.

DEVINE, EDWARD T. *The Principles of Relief.* Macmillan, 1904. 595 pp. \$2.00.

Part I, pp. 1-181, deals with principles, especially adequacy of relief for rehabilitation. Part III, pp. 269-480, is historical and illustrative.

DEVINE, EDWARD T. *Efficiency and Relief.* Columbia University Press, 1906. 71 pp. \$2.00.

It sets forth, in the writer's characteristic style, the great service which may be rendered by a university by relating its fund of theoretical knowledge to the practical problems of society. An address delivered at the inauguration of the Jacob Schiff chair of Social Economy in Columbia University.

DEVINE, EDWARD T. *Spirit of Social Work.* Charities Publication Committee, 1911. 231 pp. \$1.00.

Nine inspiring addresses dealing with present day social problems expressing the author's conviction "that ancient wrongs shall be righted."

HENDERSON, CHARLES RICHMOND. *Citizens in Industry.* D. Appleton Co., 1915. 341 pp. \$1.50.

An interesting book for nurses contemplating doing industrial nursing.

KELLEY, FLORENCE. *Some Ethical Gains by Legislation.* Macmillan, 1905. 341 pp. \$1.25.

The legal problem of child and woman laborers is ably and pointedly discussed by the General Secretary of the National Consumers' League.

PATTEN, SIMON N. *Social Basis of Religion.* (American Social Progress Series.) Macmillan, 1911. 247 pp. \$1.25.

Like everything Dr. Patten writes, trenchant and stimulating.

RYAN, JOHN A. *A Living Wage.* Macmillan, 1906. 346 pp.

Discusses the ethical and economic aspects of the wage problem, the requirements for decent living, and the obligations of employer, employee and state in arriving at a just settlement of existing differences.

STEINER, EDWARD A. *Against the Current. The Immigrant Tide—Its Ebb and Flow. On the Trail of the Immigrant.* Revell. \$1.50 each.

All of these books portray in the most vivid manner and with the truthfulness born of personal knowledge, the life and problems of the immigrant classes at home and in America. They are written in story form.

WILLIAMS, HENRY SMITH. *Alcohol: How It Affects the Individual, the Community and the Race.* Century, 1909. 151 pp. \$2.00.

A concise, unprejudiced, unimpassioned presentation of the findings of recent science as to the effects of alcohol. Practically all the effects, both individual and social, are brought under consideration. Considering its size and comprehensiveness, this is the best book of its kind.

XXXIV. DICTIONARIES AND ENCYCLOPEDIAS.

1. *Dictionaries.*

CATTEL, HENRY W. (*Editor*). *Lippincott's New Medical Dictionary.* Lippincott. 1108 pp., ill. \$5.00.

An up-to-date dictionary which is something in the nature of an encyclopedia as well, giving not only spelling, definitions, derivation and pronunciation of medical and scientific terms, but some description of the symptoms, etiology and treatment of the different diseases; dose, actions and therapeutic use of drugs, etc.

DORLAND, W. *American Illustrated Medical Dictionary.* Saunders. \$4.50 to \$5.00.

DORLAND, W. *American Pocket Medical Dictionary.* Saunders. \$1.00 to \$1.25.

GOULD, GEO. M. *Student's Medical Dictionary.* Blakiston, 11th ed., 1908. 840 pp., ill. \$3.00.

Including those words and phrases generally used in medicine, with their proper pronunciation and definition, based on recent medical literature, with table of eponymic terms and tests, tables of bacilli, arteries, muscles, nerves, etc.

GOULD, GEO. M. *Pocket Dictionary.* Blakiston, 4th ed., 838 pp. \$1.00 to \$1.25.

A condensed medical lexicon containing 30,000 words, with definitions and pronunciations, also tables and lists of anatomical and therapeutic terms.

POPE, AMY E. *A Medical Dictionary for Nurses.* G. P. Putman's Sons, 1914. 288 pp. Cloth \$1.00.

As the title suggests, this dictionary is arranged for nurses and contains not only terms used in medicine, but also supplementary tables of weights and measures, chemical symbols and tables containing other important information, arranged with special reference to nurses.

STEDMAN, THOS. LATHROP. *A Practical Medical Dictionary.* Wood, 1911. 1,000 pp., ill. \$4.50.

A comprehensive and reliable medical dictionary.

XXXV. REPORTS OF ORGANIZATIONS OF INTEREST TO NURSES.

American Association for the Conservation of Vision. 105 E. 22d street, New York City.

American Association for the Study and Prevention of Infant Mortality. Miss Gertrude B. Knipp, Secretary Medical and Chirurgical Faculty Building, Baltimore, Md.

American Home Economics Association. Roland Park, Baltimore, Md. Reported in *Journal of Home Economics*.

American Nurses Association. Reported in the *American Journal of Nursing*, 45 S. Union street, Rochester, N. Y.

American Public Health Association.

American Society of Sanitary and Moral Prophylaxis. 9 E. 42d street, New York City.

International Congress of Nurses. 431 Oxford street, London, England.

International Congress on Hygiene and Demography.

International Congress of School Hygiene.

International Congress on Tuberculosis (6th). Wm. F. Fell Co., Philadelphia, Pa.

National Association for the Study and Prevention of Tuberculosis. 105 E. 22d street, New York City.

National Child Labor Committee. Owen R. Lovejoy, Secretary, 105 E. 22d street, New York City.

National Conference of Charities and Corrections. Alexander Johnson, Angola, Ind.

National Consumers League. Mrs. Florence Kelley, 105 E. 22d street, New York City.

National Vigilance Committee for the Suppression and Prevention of the White Slave Traffic, 156 Fifth avenue, New York. Room 527.

Queen Victoria Jubilee Institute. London, England.

Victorian Order of Nurses. Ottawa, Canada.

XXXVI. PERIODICALS.

1. *Nursing and Hospitals.*

American Journal of Nursing. 45 S. Union street, Rochester, N. Y. (Monthly.) \$2.00.

Australasian Nurses Journal. Sydney, N. S. Wales. (Monthly.) \$1.50.

British Journal of Nursing. Macmillan Co., 431 Oxford street, London.

Canadian Nurse. 408 McKinnon Building, Toronto, Ont. (Monthly.) \$1.00.

Epione. Helsingfors, Finland.

Hospital World. (International.) 145 College street, Toronto, Canada. (Monthly.) \$3.00.

Modern Hospital, Metropolitan Building, St. Louis, Mo.

Kai Tiaki. Wellington, New Zealand.

L'Infirmière (French). Bruxelles, Belgium.

Nosokomos. Amsterdam, Holland.

Nurses Journal of India. British India Press. Byculla, Bombay. \$1.50.

Pacific Coast Journal of Nursing. 721 Call Building, San Francisco. \$1.50.

Public Health Nurse Quarterly. 612 St. Clair avenue, Cleveland, Ohio. \$0.50.

Queen's Nurses. (British—for District and School Nurses.) 58 Victoria street, London, S. W. (Quarterly.) \$0.50.

Svensk Sjukskötersketidning. Stockholm, Sweden.

Tidsskrift for Sygeplege. Copenhagen, Denmark.

Una. (Australian.) 59 Swanston street, Melbourne, Australia. (Monthly.) \$1.50.

Untern Lazaruskreuz. Berlin, Germany.

Alumna Magazine. Johns Hopkins Hospital, Baltimore, Md.

Alumna Magazine, Presbyterian Hospital, New York.

2. *Miscellaneous.*

American National Red Cross Magazine. \$1.00.

American Health Magazine. Published by the Committee of One Hundred on National Health, New Haven, Conn. \$1.00.

Journal of Home Economics. Published bimonthly by the American Home Economics Association. Roland Park, Baltimore, Md. \$2.00.

Journal of American Medical Association. 525 Dearborn avenue, Chicago, Ill. \$5.00.

Gives general medical and hospital news, public health movements, etc.

Journal of the Outdoor Life. Trudeau, Saranac Lake, N. Y. \$1.00.

Organ of antituberculosis movement.

Monthly Bulletins, California State Board of Health. (Sent free on request.)

Survey. (Weekly.) 105 East 22d street, New York. \$2.00.

Philanthropy and Social Progress.

Vigilance. Published by the National Vigilance Committee for the Suppression and Prevention of the White Slave Traffic, 156 Fifth avenue, New York City. Room 527.

XXXVII. BIBLIOGRAPHIES.

Annotated List of Books Relating to Household Arts. By the School of Household Arts. Technical Education Bulletin, No. 2. Teachers College, Columbia Univ., N. Y., 1910. \$0.15.

Annotated List of Books Relating to Industrial Arts and Industrial Education. By the School of Industrial Arts. Technical Education Bulletin, No. 6. Teachers College, Columbia Univ., N. Y., 1910. \$0.15.

Bibliography of Educational Hygiene and Physical Education. Thomas D. Wood and Mary Reesor. Published by Teachers College, Columbia Univ., N. Y. \$0.20.

Bibliography of Education. Published annually by U. S. Bureau of Education, Government Printing Office, Washington, D. C. (Free.)

Bibliography of Social Science. Univ. of Chicago Press. \$0.50 per copy, \$6.00 per year.

Bibliography prepared by the National Vigilance Committee (see above) on the subject of Prostitution, Traffic in Women, State Regulation, etc. \$1.00. Also a Bibliography on Education in reference to Sex. (Free.) 156 Fifth avenue, N. Y. City. Room 527.

Bibliography of Child Study. Published by U. S. Bureau of Education, Government Printing Office, Washington, D. C. (Free.)

Encyclopedia of Social Reform. (Bibliography at end of each subject.)

Guide to Reading in Social Ethics and Allied Subjects. By Teachers in Harvard University. Published by Harvard University, Cambridge, Mass., 1910. \$1.25.

Index Medicus. A monthly classified record of current medical literature of the world. Published by Carnegie Institution, Washington. (Found in medical libraries.)

List of Recent Scientific and Medical Books published biannually in Journal of American Medical Association.

List of Books on Domestic Science. Published by the Boston Public Library. \$0.10.

Poole's Index—a guide to magazine articles published in representative periodicals, English and American. (Found in public libraries.)
